- Mac-to-Mac compatibility
- Windows-to-Mac (and Mac-to-Windows) compatibility with auto-launching software built into the cable
- No CDs or downloads required
Note: This cable is not for charging or transferring data from a smart phone to computer.

SYSTEM REQUIREMENTS
- Windows® 10
- macOS 10.12 or later
- USB-A or USB-C port

GETTING STARTED
Complete the following steps to launch the software on **each** Windows or Mac computer that you are connecting. For instance, if you connect a PC to a Mac, follow the PC setup steps on your PC and the Mac setup steps on your Mac.

LAUNCHING THE SOFTWARE ON WINDOWS PCS (SmartDatalink SOFTWARE)
Note: If your computer has a USB-C port, attach the USB-C adapter before you connect the cable.

1 Connect the cable from one computer to the other. The software detects the connection. Connecting for the first time may take a few minutes.
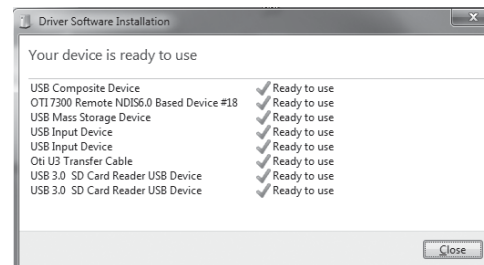

2 After installing, SmartDatalink runs automatically, then you can start to transfer your file. If Autoplay does not open, go to *MyComputer*, then double-click **SmartDatalink.exe**.
LAUNCHING THE SOFTWARE ON MAC COMPUTERS (MacKMLink SOFTWARE)
1 Connect the cable from one computer to the other. The software detects the connection.

2 The MacKMLink app runs automatically. If MacKMLink doesn't run automatically, open the *Smartlink* disc icon on the desktop of your Mac.

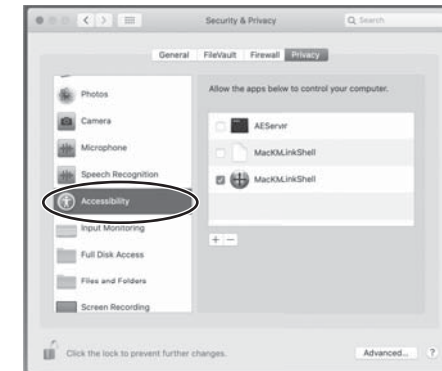

3 Double click **MacKMLink.app** to install.

4 If a window opens:
  A Click the **Open System Preferences** button.

B In the *Security and Privacy* window, make sure that **Accessibility** is selected.

C Click **Click the lock to prevent further changes**, enter your User Name and Password, then click **Unlock**.

D Make sure that **MacKMLinkShell** is selected, then close the *Security & Privacy* window.

OR

If an *Accessibility* box opens:

A Click the **System Preferences** button to open the *Accessibility Settings* window, click the lock icon in the lower left corner to unlock your system preferences, then enter your computer's User Name and Password.

B Make sure that **MacKMLink** option is checked.

C If the previous version of *MacKMLink* is checked, uncheck then recheck it.

D Make sure that **MacKMLinkShell** is selected, then close the *Security & Privacy* window.

Transferring files between computers

When the software on both computers have opened, and the connection is complete, a status icon appears on the bottom-right of the computer. One icon indicates it connected successfully and the other indicates it failed to connect.

Connected   Connection Fail
There are two ways to transfer files with SmartDatalink:

• **Option 1**: Drag the file that you want to transfer from one computer to another. A progress bar appears while the file is transferring.

Drag and move

OR

• **Option 2**: Select the files you want to transfer, then use **Ctrl + C** to copy the files. Use **Ctrl + V** to paste the files.

Ctrl+C and Ctrl+V

Note: If you get an error message on your Mac system stating that you cannot write files to a specific folder, choose another folder that does not have user restrictions. See the documentation that came with your computer for information on modify write permissions for a folder.

Sharing the mouse and the keyboard

This transfer cable supports two computers sharing the mouse and the keyboard. You can use a mouse to control another computer. Use ALT+S to switch the mouse between the two computers and to use the keyboard to type on the other computer.

You can setup preferences such as selecting position on PC or enable or disable the keyboard and mouse control.
TROUBLESHOOTING

If the connection is not successful, unplug the cable, then reconnect it. If the software doesn't open automatically, you can open it manually.

LEGAL NOTICES

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, maybe cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

· Reorient or relocate the receiving antenna.
· Increase the separation between the equipment and receiver.
· Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
· Consult the dealer or an experienced radio/TV technician for help.
