Getting Started

Installing the Swann Security App

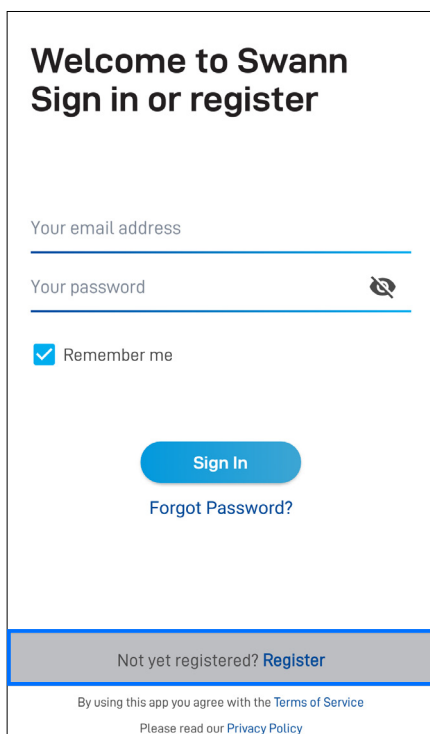

Search and download the latest version of the Swann Security app using the Google Play™ store app on your phone.

Swann Security

After the Swann Security app is installed on your phone, the Swann Security app icon appears on the Home or Apps screen. To open the Swann Security app, tap the app icon.

Creating your Swann Security Account

Welcome to Swann
Sign in or register

Your email address

Your password

☒ Remember me

Sign In

Forgot Password?

Not yet registered? Register

By using this app you agree with the [Terms of Service](#)
Please read our [Privacy Policy](#)

Open the Swann Security app and tap **Not yet registered? Register**.

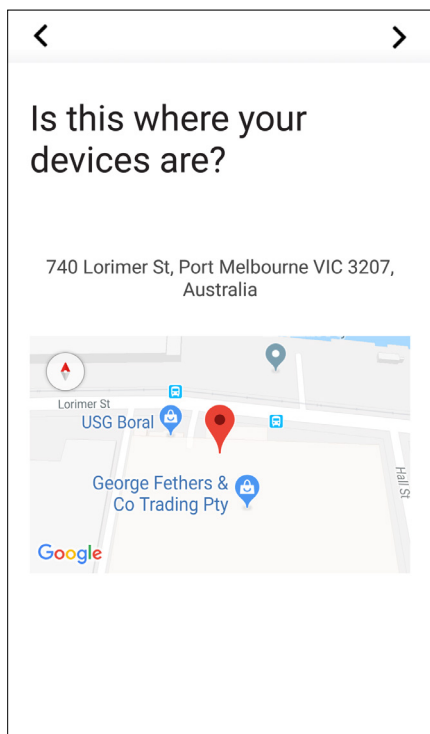

Let's get started.

First name

Last name

Enter your first and last names, then tap **Next**. This helps us verify your identity if you contact us for assistance with your account or device.

Is this where your devices are?

740 Lorimer St, Port Melbourne VIC 3207, Australia

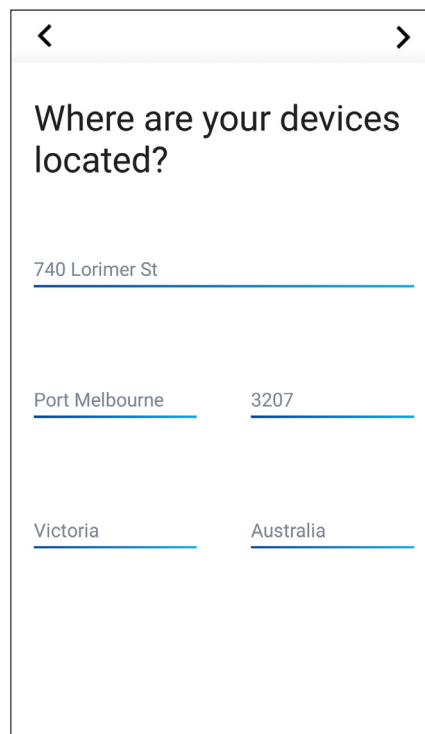

Lorimer St
USG Boral
George Fethers & Co Trading Pty
Hall St

Google

If Location (GPS) is turned on for your phone, your approximate address based on your phone's current location is automatically shown.

If Location (GPS) is turned off, you can enter your address manually on the next screen.

Tap ➤.

Where are your devices located?

740 Lorimer St

Port Melbourne 3207

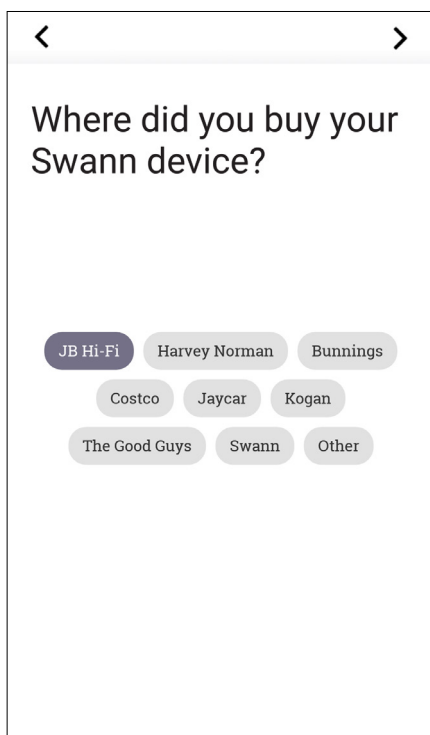

Victoria Australia

Enter your device address (if Location is off) or make any changes to the auto-populated address fields if necessary, then tap ➤.

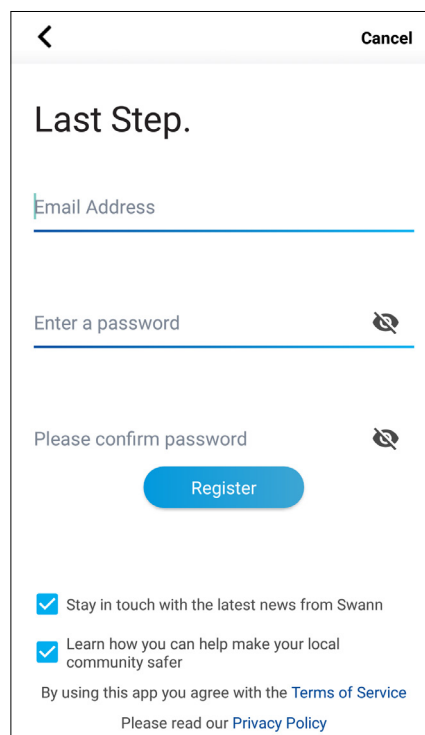

This helps us personalize your experience on the Swann Security app and other Swann services.

(Continued on the next page)

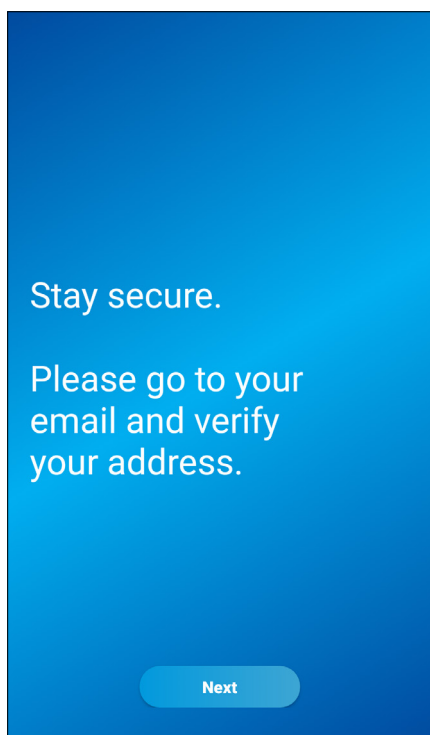

Creating your Swann Security Account

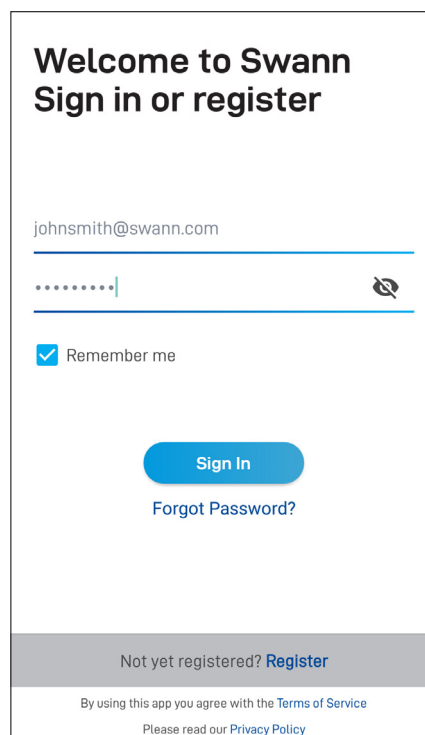

Select the place where your Swann device was purchased, then tap ➤.

Enter your email address, desired password (between 6 - 32 characters), and confirm the password. Read the Terms of Service and Privacy Policy, then tap **Register** to agree to the terms and create your account.

Go to your email inbox and open the link in the verification email from Swann Security to activate your account. If you can't find the verification email, try checking your Junk folder. Tap **Next** to return to the **Sign In** screen.

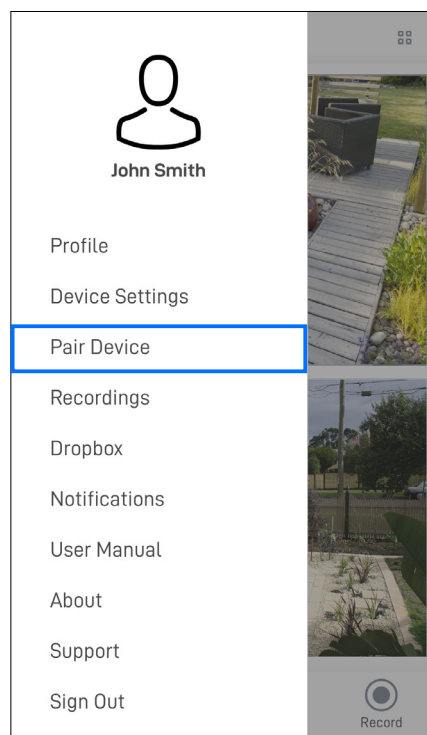

After activating your account, you can sign in using your Swann Security email address and password.

Note: Select the **Remember Me** checkbox to save your login credentials so that you don't have to sign in every time you open the app.

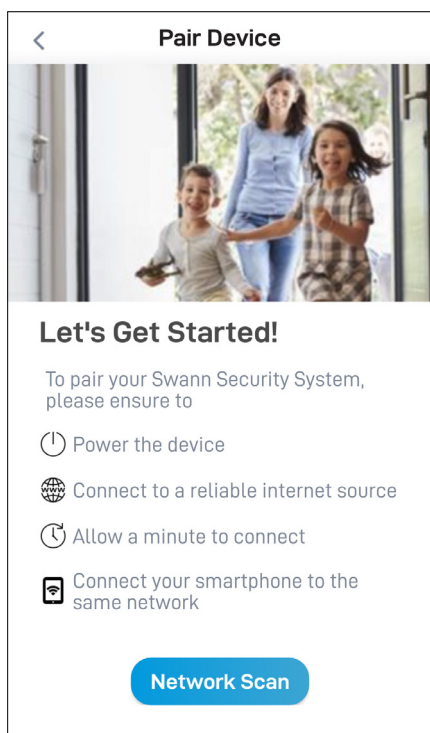

Pairing your Device

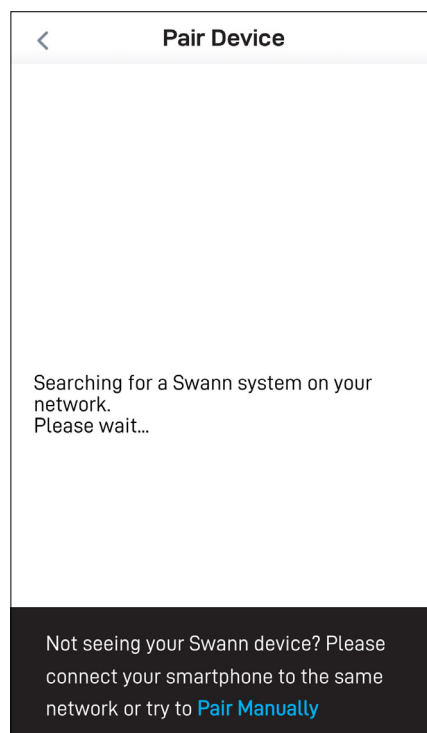

If this is your first time pairing a Swann device, tap the **Pair Device**  button.

If you want to pair a second or subsequent Swann device, open the **Menu**  and tap **Pair Device**.

Before you start, make sure your Swann device is powered and connected to your internet router. Refer to the Quick Start Guides included with your Swann device for installation and setup instructions. Tap **Network Scan** to proceed with the device pairing.

The app scans your network for Swann devices which you can pair. This can take up to 10 seconds. If your Swann device (e.g., DVR) is not detected, make sure your phone is connected to same network (i.e., same router via Wi-Fi) as your Swann device.

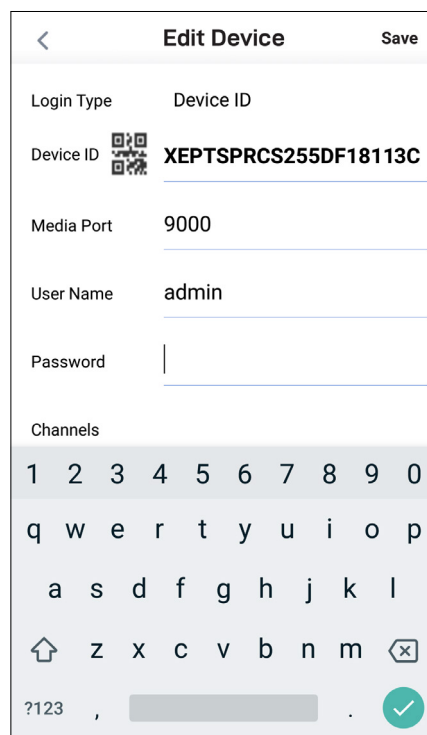

(Continued on the next page)

Pairing your Device

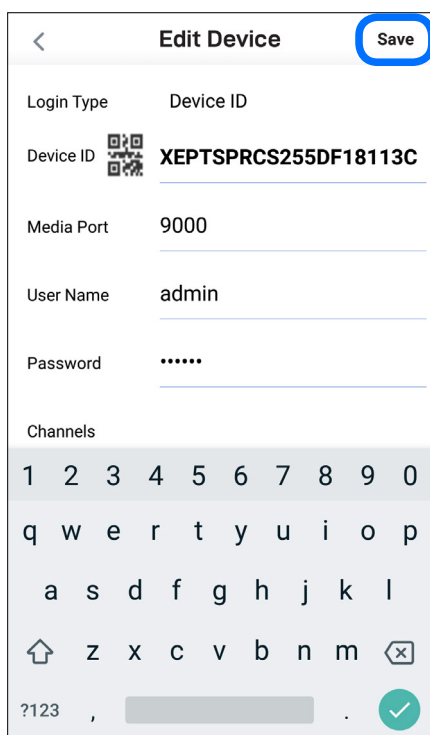

If you have one Swann device only, the app will automatically proceed to the next screen.

If the Swann Security app finds more than one Swann device on your network, select the device you want to pair.

Enter the device password which is the same password you use to log into your Swann device locally. This is normally the password that you created when first setting up your Swann device using the integrated Startup Wizard.

Pairing Manually

Not seeing your Swann device? Please connect your smartphone to the same network or try to [Pair Manually](#)

If your phone is not on the same network, you can pair your Swann device remotely.

Tap **Pair Manually**, then:

- Enter the Device ID. You can find the Device ID on the QR code sticker located on your Swann device, or
- Tap the QR code icon  and scan the QR code sticker located on your Swann device.

After that, enter the device password which is the same password you use to log into your Swann device locally and tap **Save**.

Tap **Save** to finish pairing your Swann device with the Swann Security app.

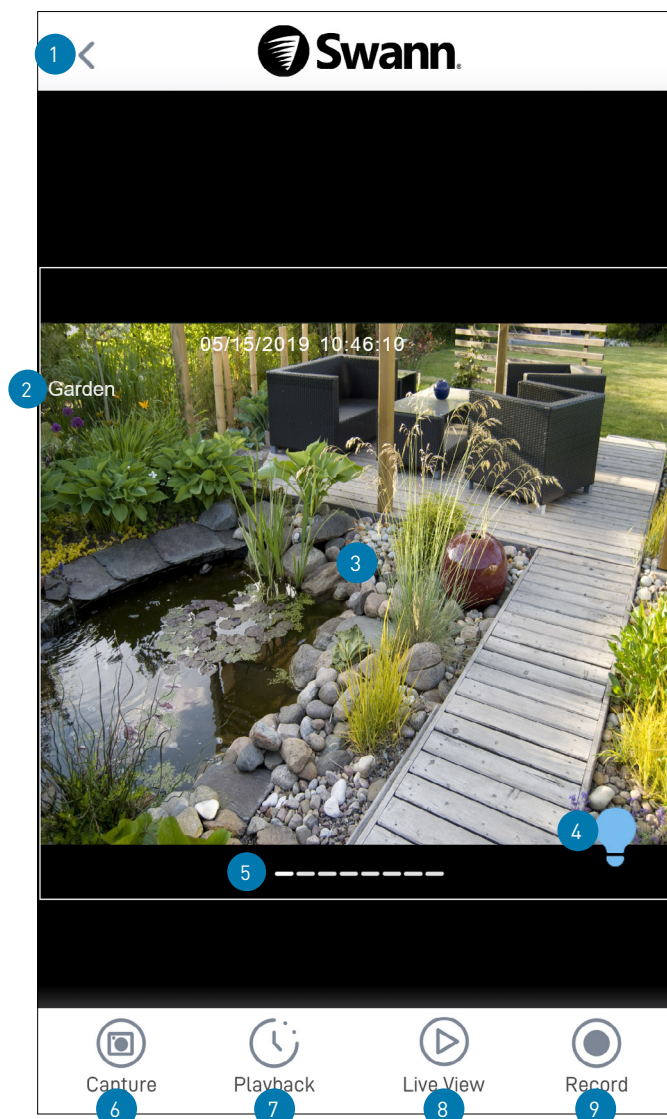

About the App Interface

Live View Screen - Multicamera View

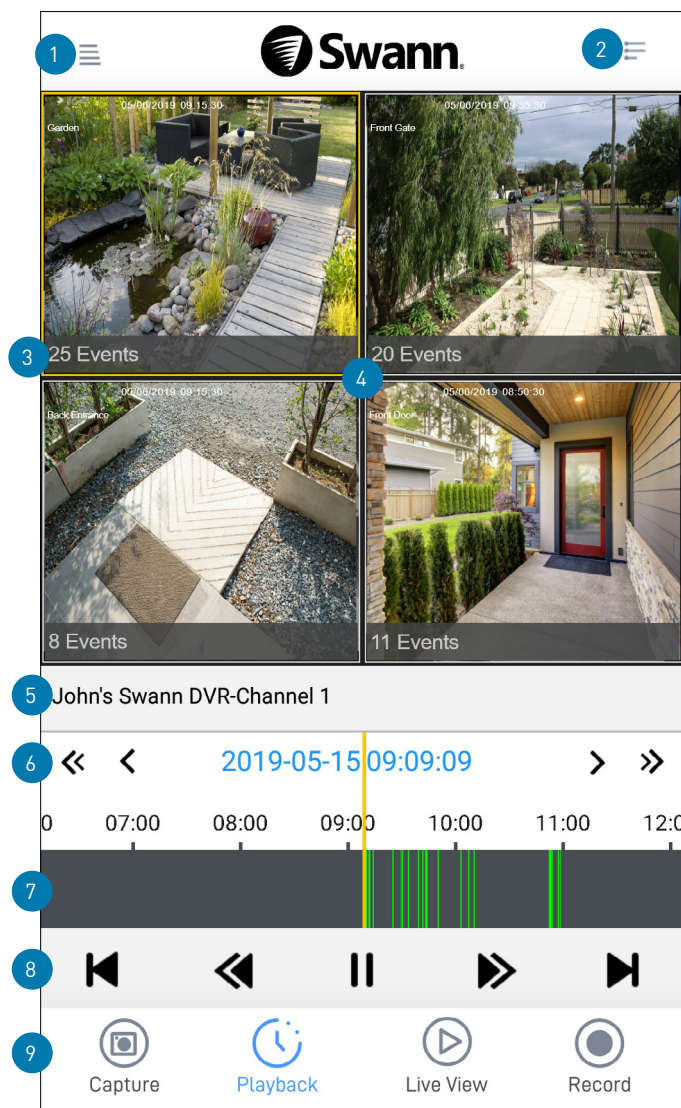

- 1 Open the menu where you can edit your account profile, manage device settings, pair a new device, view app notifications, and more. See ["Menu" on page 14](#).
- 2 The red notification dot indicates the number of unread motion notifications. The dot will disappear once no unread notifications remain on the Notifications screen. For more information, see ["Notifications screen" on page 18](#).
- 3 Toggle the camera layout of the viewing area between list and two-column grid views.
- 4 The camera (channel) name.
- 5 The viewing area.
 - Scroll up or down to see more camera tiles.
 - Double-tap a camera tile to watch live video on a separate single-camera screen with extra functionality such as snapshot and manual recording. See ["Live View Screen - Single Camera View" on page 11](#).
- 6 If the camera has the spotlight function, the bulb icon is displayed to let you easily turn on or off the camera's spotlight.
- 7 Display a popup menu with the **Capture All** option. You can quickly capture individual snapshots of each camera tile in the viewing area. You can find your snapshots on your phone's internal memory in the "swannsecurity/images" folder.
- 8 Display the Playback screen where you can search and playback camera recordings with timeline visualization directly from your Swann device storage. See ["Playback Screen - Multicamera View" on page 12](#).
- 9 The Live View tab. The icon is highlighted when in use.
- 10 Display a popup menu with the **Record All** and **Stop All** options. You can record all cameras in the viewing area at the same time to your phone with a single tap. You can find your app recordings in **Menu > Recordings**.

Live View Screen - Single Camera View

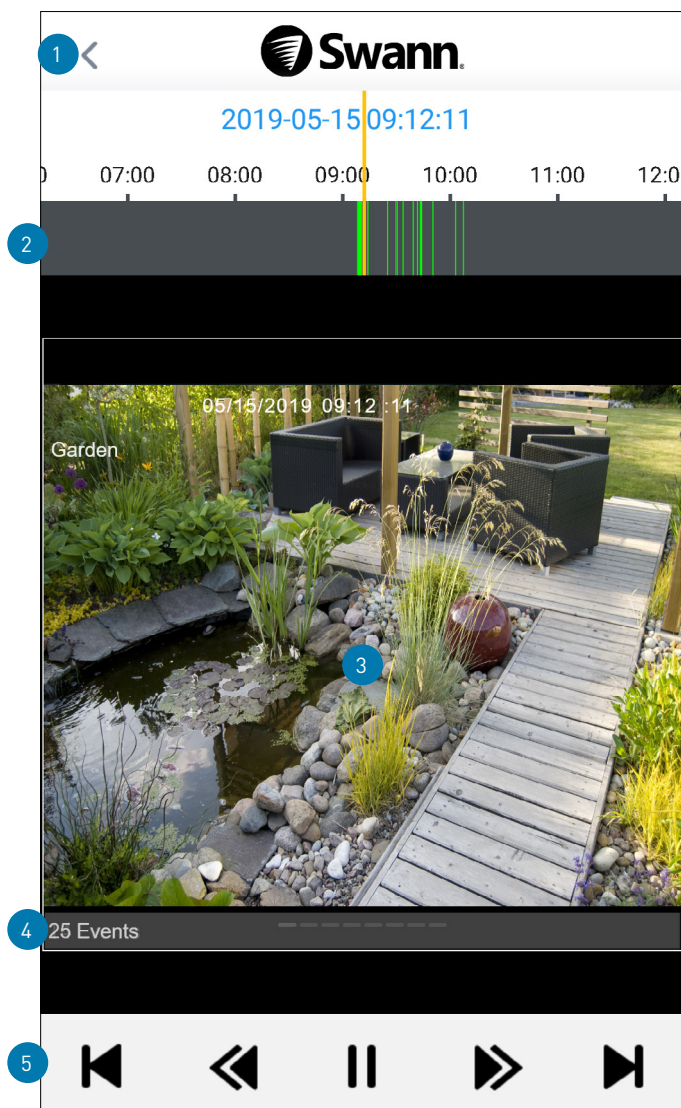

- 1 Return to the Live View multicamera screen.
- 2 The camera (channel) name.
- 3 The video window. Swipe left or right to display the previous or next camera. Turn your phone sideways for landscape view.
- 4 If the camera has the spotlight function, the bulb icon is displayed to let you easily turn on or off the camera's spotlight.
- 5 The highlighted bar indicates which camera channel (ascending numerical order - channel 1, channel 2, etc) is currently being viewed.
- 6 Tap to capture a snapshot. You can find your snapshots on your phone's internal memory in the "swannsecurity/images" folder.
- 7 Display the Playback screen where you can search and playback camera recordings with timeline visualization directly from your Swann device storage. See **"Playback Screen - Multicamera View"** on page 12.
- 8 Return to the Live View multicamera screen.
- 9 Tap to record a video clip. Tap again to stop the recording. You can find your app recordings in **Menu > Recordings** or on your phone's internal memory in the "swannsecurity/record" folder.

Playback Screen - Multicamera View

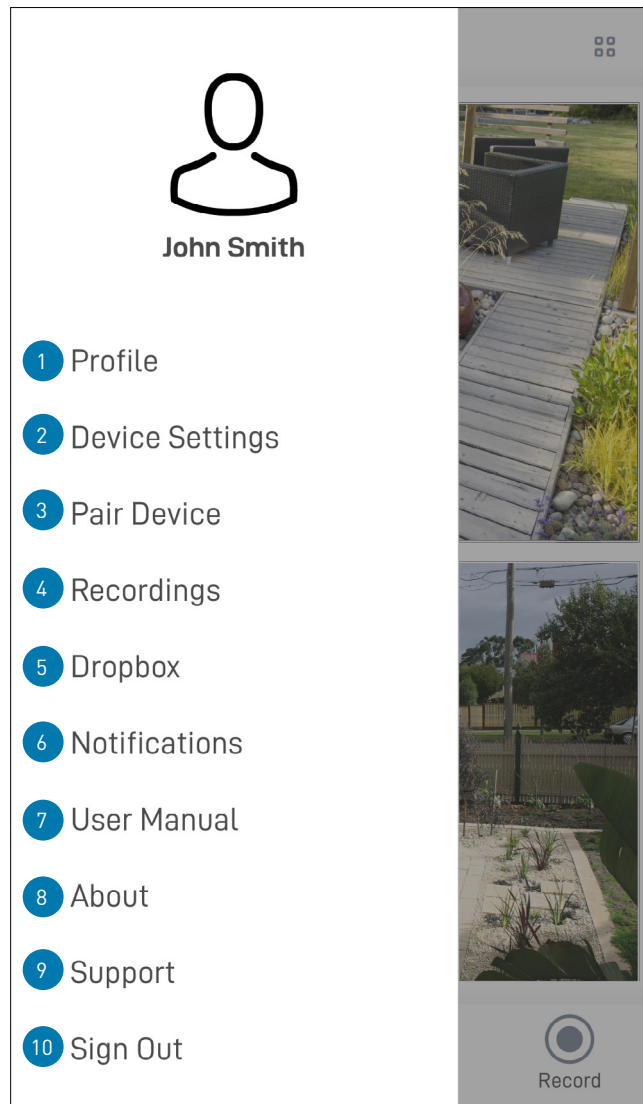

- 1 Open the menu where you can edit your account profile, manage device settings, pair a new device, view app notifications, and more. See ["Menu" on page 14](#).
- 2 Toggle the camera layout of the viewing area between list and two-column grid views.
- 3 The number of recorded camera events on the specified timeline date available for playback.
- 4 The viewing area.
 - Scroll up or down to see more camera tiles.
 - Tap a camera tile to select it and show the corresponding graphical event timeline. A yellow border appears around the camera tile that you have selected.
 - Double-tap a camera tile to watch live video on a separate single-camera screen with extra functionality such as snapshot and manual recording.
- 5 The device name and currently selected camera's channel number.
- 6 The Previous month, Previous day, Next day, and Next month navigation arrows to change the timeline date.
- 7 The selected camera's (yellow border) corresponding graphical event timeline. Scroll left or right to adjust the time range and select the precise moment to start video playback using the yellow timeline marker. The green segments represent recorded motion events.
- 8 Tap the corresponding button to play previous recorded event, rewind (tap repeatedly for x0.5/x0.25/x0.125 speed), pause/resume, fast-forward (tap repeatedly for x2/x4/x8/x16 speed), or play next recorded event.
- 9 Tap the corresponding button to display the Capture All option to take snapshots, return to Live View, or display Record All option to record all cameras currently being playback in the viewing area at the same time to your phone. You can find your snapshots and recordings on your phone's internal memory in the "swannsecurity/images" and "swannsecurity/record" folders.

Playback Screen - Single Camera View

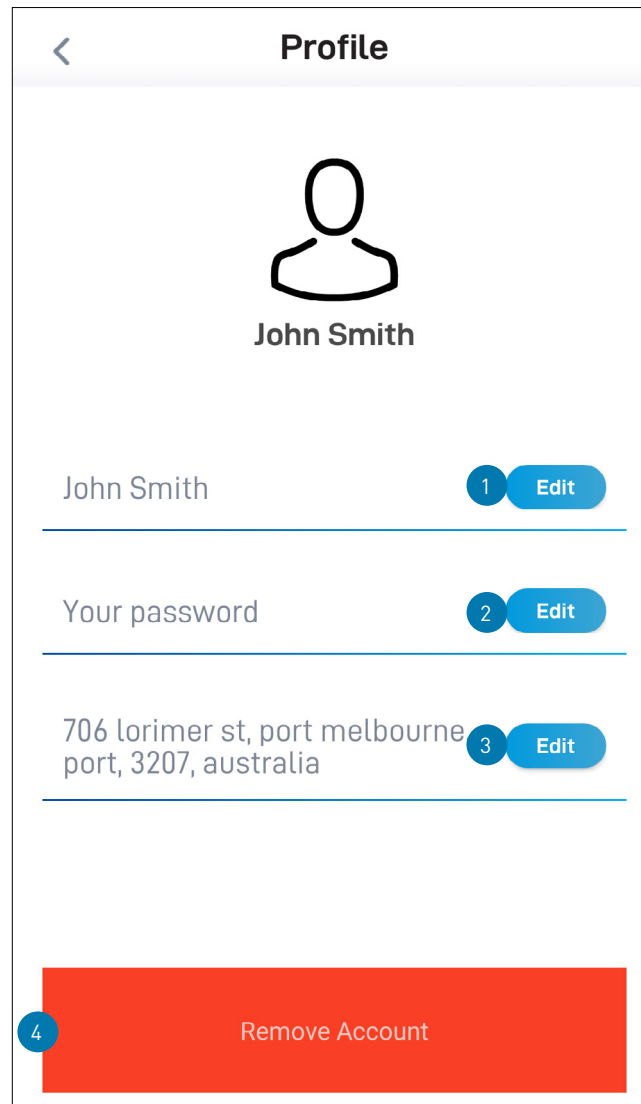

- 1 Return to the Playback multicamera screen.
- 2 The selected camera's corresponding graphical event timeline. Drag left or right to adjust the time range and select the precise moment to start video playback using the yellow timeline marker. The green segments represent recorded motion events.
- 3 The video window. Swipe left or right to display the previous or next camera channel and corresponding event timeline. Turn your phone sideways for landscape view.
- 4 The number of recorded camera events on the specified timeline date available for playback. To view recordings for a different date, go back to the Playback multicamera screen and change the timeline date.
- 5 Tap the corresponding button to play previous recorded event, rewind (tap repeatedly for x0.5/x0.25/x0.125 speed), pause/resume, fast-forward (tap repeatedly for x2/x4/x8/x16 speed), or play next recorded event.

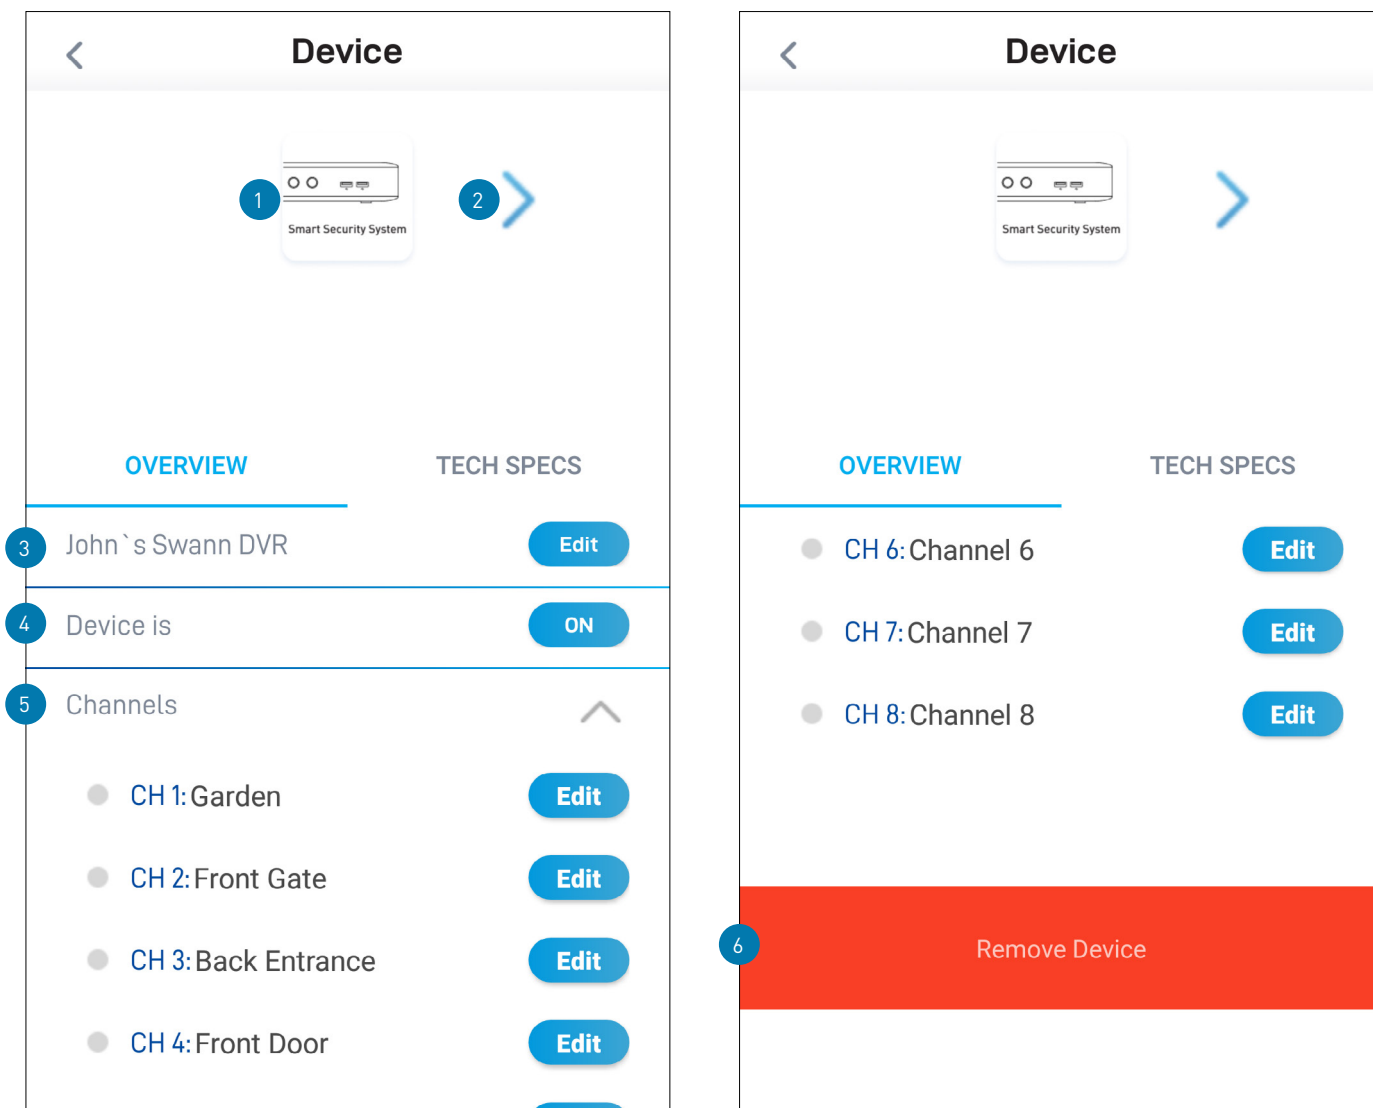

- 1 Update your profile name, account password, and location. For more information, see **"Profile Screen" on page 15**.
- 2 View technical information and manage general settings for your devices such as changing device name. For more information, see **"Device Settings: Overview" on page 16**.
- 3 Pair Swann devices with the app.
- 4 View and manage your app recordings.
- 5 Connect Swann Security to Dropbox and use cloud storage for your devices (if supported on your Swann device).
- 6 View history of motion detection notifications and manage notifications from the app.
- 7 Download the app user manual (PDF file) to your phone. For best viewing experience, open the user manual using Acrobat Reader (available on the App Store or Google Play).
- 8 Display the Swann Security application version information and access the terms of service and privacy policy.
- 9 Open the Swann Support Center website on your phone's web browser.
- 10 Sign out of the Swann Security app.

Profile Screen

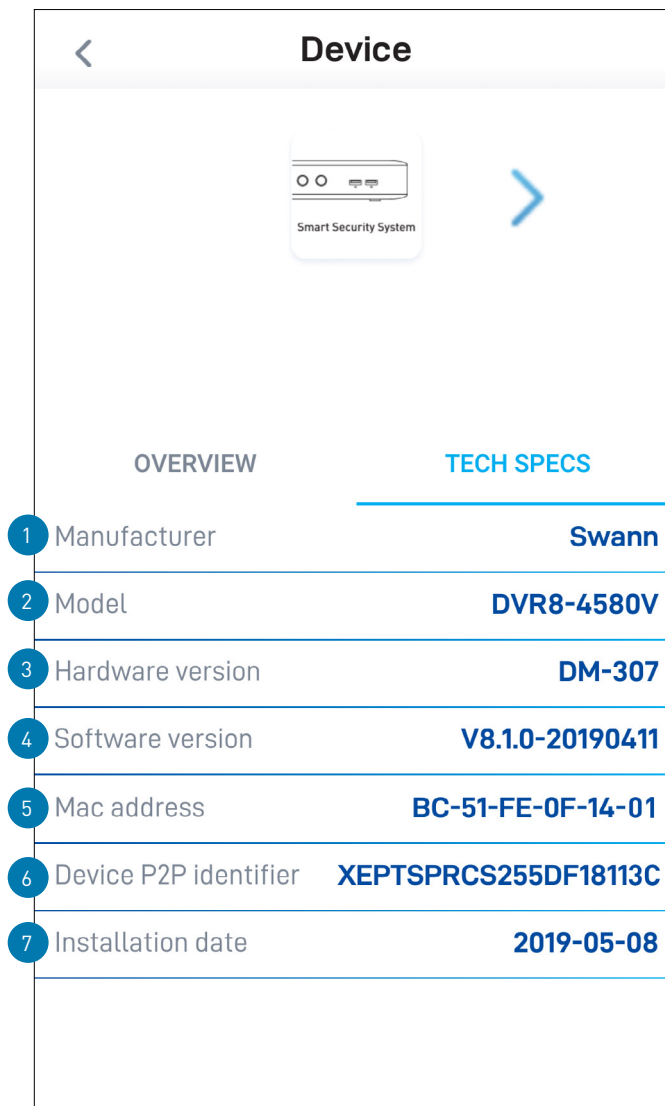

- 1 Tap to edit your name.
- 2 Tap to change your Swann Security account login password.
- 3 Tap to change your address.
- 4 Swipe left and tap the **Bin**  button to delete your Swann Security account. A confirmation link will be sent to your registered email address. Open the link to confirm that you want to permanently delete your account.

Device Settings: Overview

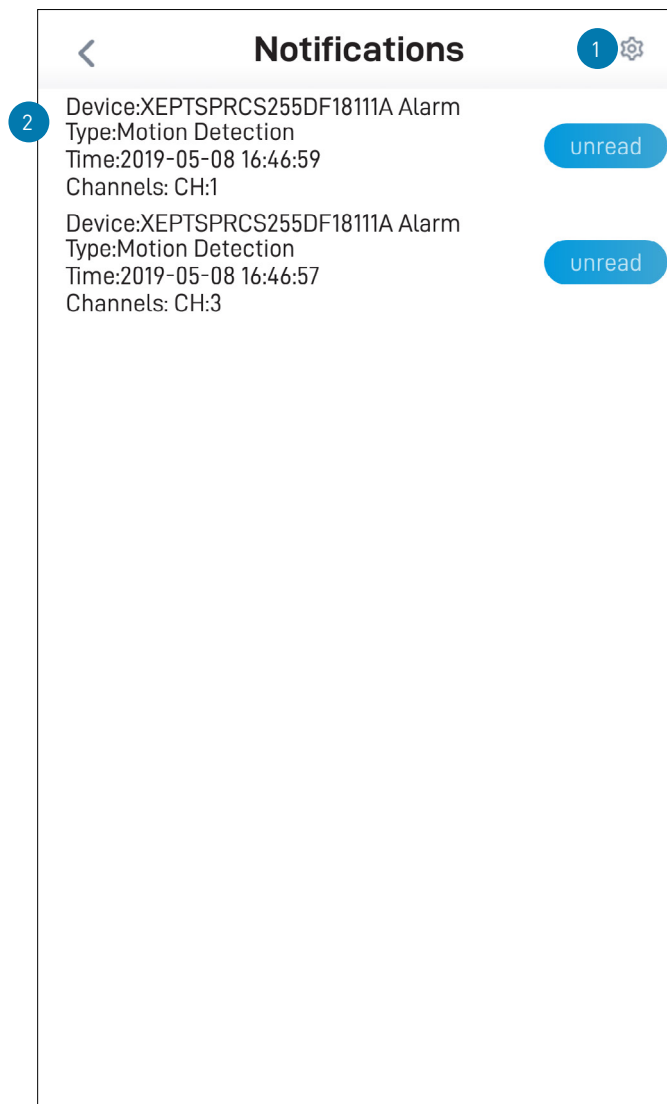

- 1 The type of Swann device paired.
- 2 Tap to go directly to the Live View screen.
- 3 The current name of your device. Tap the **Edit** button to change it. If you rename the device name in the app, it will also be automatically reflected on your Swann device interface.
- 4 The current connection state of your device.
- 5 Scroll up or down the Channels area to view more camera channels available on your device. Tap the **Edit** button of the corresponding camera channel to change its name. If you rename the camera channel in the app, it will also be automatically reflected on your Swann device interface.
- 6 To remove (unpair) the Swann device from your account, swipe left, then tap the **Bin** button.

Device Settings: Tech Specs

- 1 The device's manufacturer name.
- 2 The device's model code.
- 3 The device's hardware version.
- 4 The device's software version.
- 5 The device's MAC address—a unique 12-character hardware ID assigned to the device so it is easily identifiable on your network. The MAC address can also be used to reset the password on your device locally (available for certain models only. Refer to your Swann device's instruction manual).
- 6 The device ID. It is used to pair the device with your Swann Security account through the app.
- 7 The device's installation date.

Notifications screen

1 Display the menu options to manage device notification settings and clear the notifications history.

2 There are two ways you can be notified when there is motion activity:

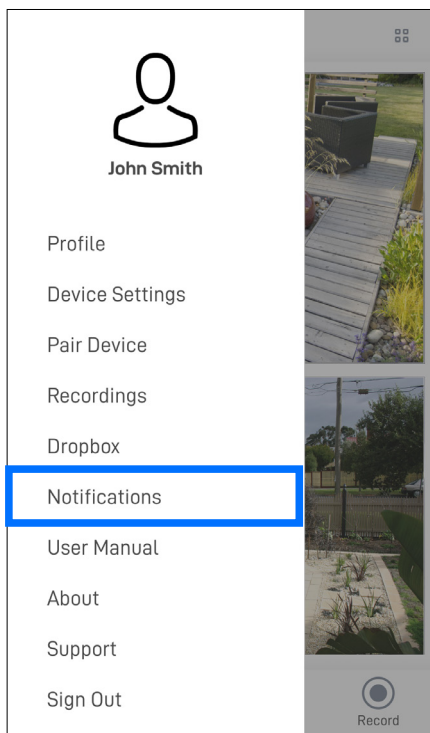

- When the app is open in the foreground, you are alerted to new motion events within the app in the Notifications area as shown above. Unread notifications will be marked by the "Unread" label. Tap on a notification to go directly to the Live View screen of the associated camera channel. This also clears the "Unread" label.
- When the app is running in the background, motion alerts will be sent as push messages to your phone. Check your phone's notification panel.

Note: The Notifications feature is not enabled by default. To receive in-app alerts and push messages from Swann Security, the Push Notifications setting in the app must be turned on. See ["Enabling or Disabling Push Notifications" on page 20](#).

Tips & FAQs

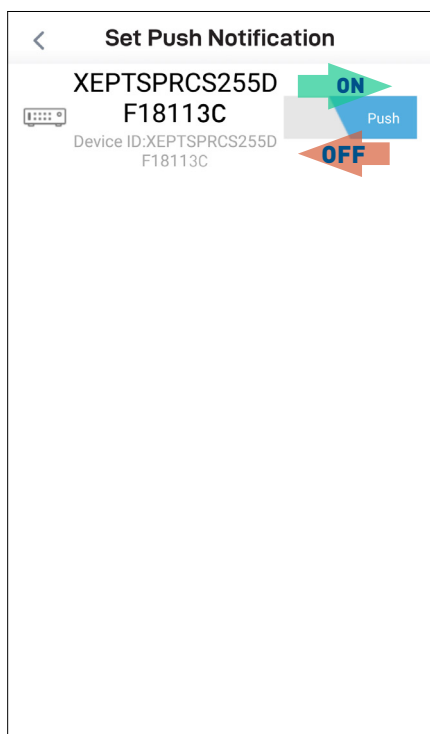

Enabling or Disabling Push Notifications

Open the menu and tap **Notifications**.

Tap the Gear  icon at the top right.

To receive notifications from Swann Security, make sure the **Push** toggle switch is **On** for your Swann device.

If you want to stop receiving notifications from Swann Security in the future, simply turn off (swipe left) the **Push** toggle switch.

For Swann DVR/NVR devices:

Motion	
Channel	Push ▾
CH1	<input checked="" type="checkbox"/>
CH2	<input checked="" type="checkbox"/>
CH3	<input checked="" type="checkbox"/>
CH4	<input checked="" type="checkbox"/>

After enabling notifications on the app, go to **DVR/NVR Main Menu > Alarm > Detection > Actions** and make sure the '**Push**' option is ticked on the corresponding camera channels for which you want to receive Swann Security app notifications, as shown above.

Frequently Asked Questions

I have forgotten my Swann Security account password. How do I reset it?

Tap the "Forgot Password" link on the Sign In screen of the Swann Security app and submit the email address that you used to create your account. You'll shortly receive an email with instructions on how to reset your account password.

Can I access my devices on another phone?

Yes. Just install the Swann Security app on your other phone and sign in using the same Swann Security account credentials. For privacy, make sure to sign out of the app on any secondary devices before switching back to your primary phone.

Can I register my devices to another Swann Security account?

A device can be registered to a single Swann Security account only. If you want to register the device to a new account (for example, if you want to give the device to a friend), you'll first need to remove the device (i.e., unpair) from your account. Once removed, the camera can be registered to another Swann Security account.

Where can I find the snapshots and recordings captured using the app?

Your snapshots and recordings are saved to your phone's internal memory in the "swannsecurity/images" and "swannsecurity/record" folders.

How do I get alerts on my phone?

To receive notifications from Swann Security when motion activity happens, simply turn on the Notifications feature in the app. For more information, see **"Enabling or Disabling Push Notifications" on page 20**.
