

QUICK SETUP GUIDE

6-Outlet Surge Protector

NS-SP1A1C26

PACKAGE CONTENTS

- 6-outlet surge protector
- Quick Setup Guide

FEATURES

- Six AC outlets power multiple electronics at the same time
- One USB-C port and one USB-A port (18W total) charge your smartphones, tablets, and more
- 1,800 joules of protection safeguard your connected devices against power surges and spikes
- 6 ft. (1.83 m) cord length offers flexible placement options
- Low-profile 45° offset plug won't block your other power outlets
- LED indicator lets you know when your devices are protected

OVERVIEW

USING YOUR SURGE PROTECTOR

- Plug your surge protector into a wall outlet.
- The Protected LED lights when surge protection is working. If the indicator no longer lights, your surge protector has protected your device from a power surge. Replace your surge protector.

USB-C one-port charging

The USB-C port is suitable for iPads and smartphones. It provides up to 15W of power when used alone. See "Specifications" for specific details.

USB-A one-port charging

The USB-A port is suitable for smartphones, smartwatches, and earbuds. It provides up to 12W of power when used alone.

Two-ports charging at the same time

USB-C and USB-A provides total 18W (max) when both ports are used together.

SPECIFICATIONS

- **Dimensions (H×W×L) (not including plug):**
12.28 × 1.87 × 1.34 in. (31.2 × 4.75 × 3.4 cm)
- **Outlets:** Standard grounded outlets (6)
- **Power cord length:** 6 ft. (1.83 m)
- **Surge protection:** 1,800 Joules
- **USB-A charging port (1):** 5V/2.4A
- **USB-C charging port (1):** 5V/3A
- **USB total output:** 18W
- **Electrical rating:** 125V/15A/1875W
- **UL clamping voltage:** UL1449 4th/800V (L-N, L-G, N-G)
- **Maximum peak current:** 45,000A
- **3 AC lines protected:** L-N: 15,000A; L-G: 15,000A; N-G: 15,000A
- **Response time:** Less than one nanosecond
- **Circuit breaker:** Resettable 15A

TROUBLESHOOTING

Why isn’t my surge protector powering my devices?

- Make sure that the power is not switched OFF or the 15 Amp circuit breaker has not tripped.
- A device may be overloading your surge protector. Determine which device has overloaded your surge protector and remove it, then turn the power switch back to RESET.

Why doesn’t the Protected indicator LED turn on?

- Your surge protector may have received a power surge or spike beyond its specified limits that overloaded the protection circuitry and rendered it inactive. This means that AC lines are no longer protected from surges. Your surge protector has protected your connected equipment, as designed, but it will not protect against future surges and spikes. It should be replaced.

SAFETY INFORMATION

 CAUTION: To reduce the risk of electric shock

Use only in dry locations and only indoors.

DO NOT plug into another relocatable power tap.

DO NOT “daisy chain” surge protectors.

DO NOT use with any aquarium equipment.

DO NOT use if properly grounded outlets are not available.

DO NOT install this device if there is less than 10 meters (30 feet) of wire between the electrical outlet and electrical service panel.

DO NOT use for medical or life support equipment. This device features an internal protection that will disconnect the surge protective component at the end of its useful life, but it will maintain unprotected power to the load.

LEGAL NOTICES

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- It is recommended to consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
