

QUICK SETUP GUIDE

Water Pitcher Replacement Filters

NS-WPRF3PK

PACKAGE CONTENTS

- Water filters (3)
- *Quick Setup Guide*

FEATURES

- Designed for the Insignia 10-Cup Water Filtration Pitcher (NS-WFPTCC1)
- NSF42-certified to reduce chlorine and odors while improving the taste of your drinking water
- Long-lasting water filtration for 90 days or about 200 gallons (757 L)
- Easy to install and replace

CHANGING THE WATER FILTER

- 1** Remove the old filter cartridge from the pitcher.
- 2** Remove the new filter cartridge from the package. Soak the new filter cartridge in cold water for 10 minutes.
- 3** Install the new filter cartridge into the reservoir. Press firmly to make sure that the seal is tight.
- 4** Fill the reservoir with cold tap water. Discard the first two reservoirs of water.
- 5** Press the button for three seconds until the blue light flashes to activate the electronic indicator.

Warning: The operating temperature of this pitcher filtration system is 40° - 100° F (5° - 38° C).

TROUBLESHOOTING

Water flow is abnormally slow

- Check the indicator to see if it's time to change the cartridge. If yes, replace the cartridge immediately.
- Remove the cartridge and shake it horizontally in order to shift the granules inside.
- Remove the cartridge. Flush it under flowing water for about 30 seconds to clear a possible blockage at the exit point. Stop flushing and shake the filter horizontally. Then put the filter back in the pitcher.

Water tastes bad

- Clean the pitcher.
- Make sure that the water filter is installed correctly.
- Replace the filter cartridge.

Particles are on the surface of the filter cartridge in the filtered water

- Fine particles are part of the filter material, which may leak out during long-distance transportation due to shaking and other reasons. These particles will not have a negative impact on health. In order to remove these fine particles, see "CHANGING THE WATER FILTER".

SUBSTANCE REDUCTION

The system has been tested and certified by the NSF international according to NSF/ANSI standard 42. The certification of the indicated substances in water entering the system was reduced to a concentration less than or equal to the permissible limit for the water leaving the system, as specified by NSF/ANSI standard 42. While testing was performed under standard laboratory conditions, actual performance may vary.

REPLACEMENT ELEMENT

Replacement Cartridge NO: NS-WPRF3PK
NSF System NO: NS-WFPTCC1

Tested and Certified by NSF International against NSF/ANSI Standards 42 in Model NS-WFPTCC1 for the reduction of the claims specified on the Performance Data Sheet.

PERFORMANCE DATA SHEET

SUBSTANCE	INF. AVERAGE	NSF SPECIFIED CHALLENGE CONCENTRATION	AVE. % REDUCTION	NSF TEST REPORT
Chlorine taste and odor	2.0 mg/L	2.0 mg/L $\pm$ 10%	96.7%	J-00355920

AVERAGE PRODUCT WATER CONCENTRATION	MAX PERMISSIBLE PRODUCT WATER CONCENTRATION	NSF REDUCTION REQUIREMENTS
0.05 mg/L	N/A	$\geq$ 50%
