### INSTALLING YOUR HUB

- Plug the USB male head on the back of your PS4 USB Hub into the two USB ports on your PS4 game console. The clamps on your hub secure your hub to your game console.

The power LED turns on indicating the hub is ready for play.

**Note:** The devices connected to your hub's USB ports work when your console is turned on.

If your console's **Power Save Settings** are set to always provide power to the USB port, the device connected to your hub's USB 3.0 port also works when the console is in standby mode. (See the documentation that came with the console for information about how to set the **Power Save Settings**.)

- To remove your hub, unplug all USB devices connected to your hub, then hold the left and right side of your hub and pull it out of the game console.
