

# Wireless Blood Pressure Monitor

## Highly accurate monitoring

The Wireless Blood Pressure Monitor measures systolic and diastolic blood pressure and heart rate. FDA-cleared and medical CE approved, the Wireless Blood Pressure Monitor ensures an accurate monitoring of your blood pressure over time.

## International standards

Results are automatically compared to international standards, with a color-coded feedback, for a better understanding of your blood pressure status.

## Health Mate application

The free Health Mate application makes tracking easy by reminding you to take measurements and providing educational content on blood pressure and hypertension.

## Keep your doctor in the loop

Use the Wireless Blood Pressure Monitor for prevention or to check the efficacy of your treatment. Either way, a few taps on your smartphone is all it takes to share measurements with your doctor.

## Autonomy

1 year autonomy with 4 standard AAA alkaline batteries (supplied and installed).

## Dual connectivity

The Wireless Blood Pressure Monitor can take measurements with a Bluetooth 4.0 connection or with a USB cable linked to your smartphone or tablet.

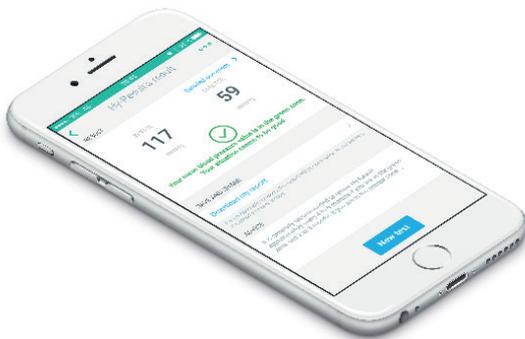

## Application

### Free Health Mate application

The Wireless Blood Pressure Monitor works in conjunction with the free Nokia Health Mate Application for iOS and Android.

The application enables you to measure your blood pressure with the push of a button, synchronizes it with your online account, and compares your results to international standards for a better understanding.

The application automatically graphs and display blood pressure trends. The app even reminds you to take your blood pressure. Once you've collected some results, you can share them with your doctor in an email, Excel or CSV file.

## Hy-Result

### Advanced blood pressure monitoring analysis

This premium feature offers a personalized and scientifically recognized assessment of your cardiovascular health directly in the Health Mate application.

Available exclusively on iOS for 4,99€.

## Specifications

### Wireless Blood Pressure Monitor

Cuff oscillometric method  
Cuff circumference : 9" - 17" (22 -42 cm)  
Accuracy :  $\pm 3$  mm Hg or 2 % reading

### Storage and memory

Free and unlimited online storage of blood pressure data  
Stores up to 100 measurements if your smartphone is not connected to internet

### Connectivity

Bluetooth and Bluetooth Smart (Bluetooth 4.0) connectivity  
Can be used with a smartphone or tablet cable using the USB adapter which is provided

### Power supply
