Troubleshooting

The image is not square
• Check that the projector's lens is parallel to your projection surface and that your projection surface is flat.

No sound
• Check the volume control on your source device to ensure the volume is turned up.

• Check the volume control on the projector to ensure the volume is turned up.

• If you are using an adapter, verify that the adapter supports audio.

• Check that the HDMI cable is fully plugged into the HDMI port.

No Signal Message
• Check that you are using the required cable and/or adapter.

• If you are using a digital AV adapter, check that the adapter is an authentic Apple adapter and is compatible with your model phone or tablet.

• If you are connecting via USB-C, check that you are using the USB-C video cable that came with the projector – this cable is labeled "USB-C Video Connector." Some USB-C cables do not support video.

• If you are connected to a laptop or computer, check your computer display settings to ensure a multiple display option is selected (such as "duplicate these displays").

• Check that your source device supports HDMI video out or USB-C video out.

Projector will not power on, or stay powered on
• Check the battery life of the projector. If one or fewer lights are illuminated, charge the battery with the USB – C cable and your MacBook USB – C power adapter, or the AC Power Adapter included with the projector.

The image is blurry
• Press the motorized focus buttons on the remote, or side of the projector to focus the image.

• Check that the surface you are projecting on is smooth and non-reflective.

Ultra Pro Projector

Quick Start Guide
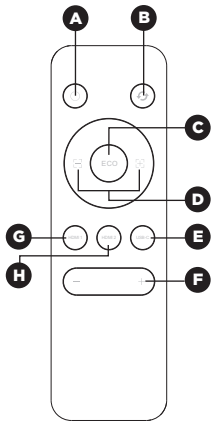

Your Miroir Ultra Pro Projector

A   **Battery Indicator Lights -** Lights flash in turn as the device charges. The battery is fully charged when all the lights illuminate and no longer flash.

B   **Lens Cover/Power -** Slide lense cover to turn device on.

C   **Projection Lens**

D   **Audio Out (3.5mm) -** (Optional) Connect an external speaker or headphones.

E   **HDMI Video Input -** Connect an HDMI cable to a device that supports HDMI video output.

F   **USB Power Output -** Connect a USB power cable to provide power to a HDMI streaming stick or to charge a smartphone battery. Cannot be used for video input.

G   **USB-C Charge/Video Input -** Connect the supplied USB-C Charge/Video cable to a device that supports USB-C video output, or connect the supplied USB-C Charge/Video cable to your MacBook Pro AC Adapter to charge the projector's internal battery. Note: Projector battery will not charge and project simultaneously via a USB-C connection. Fully charge the battery before first use (approximately 4-5 hours).

H   **Reset Button -** Press to reset projector.

I   **DC Power Input**

J   **Source Input Button -** Press to change input source.

K   **Focus Mode -** Press button then use volume +/- buttons to adjust.

L   **Volume Controls -** Increase/decrease the volume output of the projector.

M   **Rubber Foot Pads -** Provides stability and proper airflow to cooling vents.

N   **Cooling Vent**

O   **Tripod Mount -** Will fit a standard sized tripod screw. Tripod not included.

Included in the Box:
- USB-C Charge/Video Cable
- HDMI Cable
- Micro HDMI Adapter
- Quick Start Guide
- RF Remote
- AC Adapter/Charger
- Projector Drawstring Pouch
