## MINI 2

# BEATBUDDY

## Quick Start Guide

LOOK HERE FIRST

# Sound Quality

**The BeatBuddy Mini 2 sounds best when played through a full-range neutral sound system.**

Many guitar and bass amps are either not full-range (they muffle the higher frequencies) and/or provide distortion, which lowers the BeatBuddy Mini 2's sound quality.
Acoustic guitar amplifiers, PA systems, and home stereos tend to be neutral & full-range.

**Tip: Plug BeatBuddy Mini 2 in your amp's or home stereo's aux in jack if available.**

## Headphones adapter

**Use the included adapter to convert the BeatBuddy Mini 2's 6.35mm mono output jack to a 3.5mm stereo headphones jack**

The BeatBuddy Mini 2 does **not** change your instrument's sound.

The input jack lets you plug all of your pedals into the same sound system, no mixer necessary.

The volume knob only controls the BeatBuddy Mini 2's drums. It does not affect the volume of any instrument plugged into it.

If you are plugging in other pedals, the BeatBuddy Mini 2 should be **last** on the pedal effects chain, after the looper, so that its sound isn't affected by your other pedals.

**You do NOT need to have an instrument plugged in for the BeatBuddy Mini 2 to produce sound.**

# Selecting a Song

A light indicates whether you are selecting Genre, Song, or Tempo, all of which you control with a single knob.
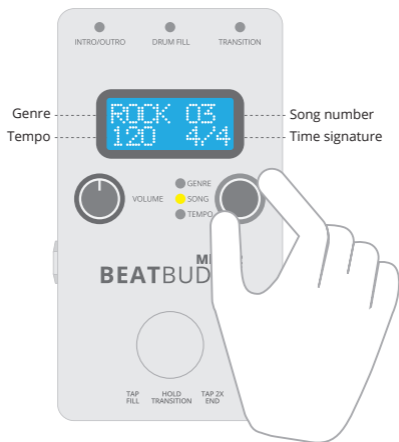

**1.** Choose one of BeatBuddy Mini 2's 24 genres by rotating the knob. Select by pressing down on the knob like a button. The green light advances from "Genre" to "Song".

**2.** Twist knob to scroll through songs within a genre. Each song's time signature and default tempo are displayed on the bottom row.

**Changing Tempo:** To change the tempo, press the knob again. The light advances from "Song" to "Tempo". Adjust the tempo by rotating the knob.

Genre ········ ROCK 03 ········ Song number
Tempo ········ 120 4/4 ········ Time signature

TAP FILL    HOLD TRANSITION    TAP 2X END

# Controlling the Beat

**Start:** Begin song by tapping the pedal. The song starts with an intro* fill, just like a real drummer, and then goes to the verse, which loops as long as you'd like.

**Fills:** If you want a fill, just tap the pedal any time, and a fill will play, perfectly in time.

**Transition:** To transition to the chorus, hold the pedal down for as long as you'd like the transition beat to last.

**Chorus:** When you're ready to start the chorus, let go. The chorus beat loops as long as you like. Return to verse the same way you transitioned to chorus.

**End:** Whenever you want to end the song, double-tap the pedal to end with an outro fill.

*To enable/disable intros: Hold down right knob. Twist to "on" or "off".  A dot is displayed by tempo when intros are off.*
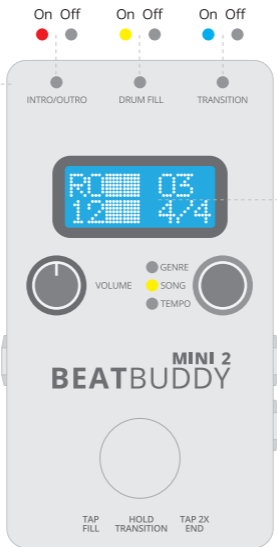

**Start/Fill**
Single tap

**Transition**
Hold down

**Verse ⟷ Chorus**
Let go

**End**
Double tap

**Tip: Hold the transition beat to play a bridge.**
