

BlackBerry® KEY2 RED EDITION

AN ICON *REBORN*

An exciting new design inspired by premium precision and performance, the special edition Red Series BlackBerry® KEY2 delivers an iconic smartphone experience unlike any other, embracing the heritage of BlackBerry that includes the most intelligent keyboard ever all in the most secure Android™ smartphone.

ICONIC BLACKBERRY DESIGN REMASTERED

The BlackBerry KEY2 Red Edition brings together premium materials and refined details in a beautifully crafted modern BlackBerry smartphone inspired by high-performance, precision sports cars. The series 7 aluminum red frame with black and silver accents, offers a clean look and feel while increasing strength, and the diamond pattern soft touch back adds to the premium design while also adding more grip and comfort. Red edition also comes with reimagined packaging and a color matched WH70 headset. Paired with BlackBerry's intelligent keyboard with a 4.5-inch touch display, the BlackBerry KEY2 Red Edition offers a mobile communications experience unlike any other smartphone available today.

THE MOST POWERFUL BLACKBERRY SMARTPHONE YET

Offering up to two days battery life, 6GB of memory and up to 128GB of storage as well as expandable storage MicroSD support, the BlackBerry KEY2 is the most advanced BlackBerry smartphone ever. Powered by a Qualcomm® Snapdragon™ processor, the BlackBerry KEY2 gives users all the power they need to get more done wherever the road takes them. In addition to Qualcomm® Quick Charge™ 3.0 and the BlackBerry KEY2 adds a new intelligent battery function that will learn from your daily charging habits and recommend when to charge up so you have enough battery life to make it through that next meeting, flight or event.

INTELLIGENT BLACKBERRY KEYBOARD

Bigger and better than ever, the key height on the BlackBerry KEY2 has been increased by 20 percent for a more comfortable and accurate typing experience. With a matte key finish and fret design for optimized key spacing, this is a keyboard that lives up to the most iconic BlackBerry keyboards. And for the first time in more than 10 years, there is a new key added to the BlackBerry keyboard with the addition of Speed Key, enabling shortcut access to any app on your device at any time. The physical keyboard continues the legacy of offering 52 customizable shortcuts for each letter key, while also supporting flick typing for faster messaging using predictive text that learns as you type.

A SAFE AND SECURE ANDROID EXPERIENCE FOUND ONLY IN A BLACKBERRY

From a hardened operating system to BlackBerry Limited's proprietary technique for establishing a hardware root of trust adding security keys to the processor, the BlackBerry KEY2 is the most secure Android smartphone. It comes pre-loaded with DTEK™ by BlackBerry, offering constant security monitoring and protection of your operating system. Locker is improved with private folders for documents and photos that don't get uploaded to the cloud, and a new private browser for when you don't want your web surfing session tracked. The BlackBerry KEY2 also receives regularly monthly Android security updates, making the KEY2 always safe and secure.
