

What is WebSite X5?

WebSite X5 is a software that guides you through each step of creating professional websites, online stores, and blogs, without needing to code. Follow the program's 5 steps, take advantage of the Drag & Drop editor, and use template and object presets to easily create responsive sites that are compatible with all browsers and the latest mobile devices. WebSite X5 is yours forever, with no monthly fees. With 1 license, you can work on 2 PCs and create as many sites as you like. Plus, since the software is installed on your PC, you can work anywhere, any time, even without an Internet connection.

STEP 1

Set up your project: Select the type of website you'd like to create and activate the features you'll need: shopping cart, blog, secure pages, etc.

STEP 2

Choose your template: Choose from over 100 template presets or create your own template from scratch. You can use the internal editor to customize it however you like.

STEP 3

Organize your site: Add all the pages you need. A navigation menu will be created according to the site map, which is active from the very first click.

STEP 4

Create the pages: Insert your content: text, photo galleries, videos, forms, social media buttons, etc. Drag & Drop makes it easy.

STEP 5

Publish your site online: Register the domain name and take advantage of the service that is included in the price to publish your website using the internal FTP engine.

Update Protection | One year of updates

The Update Protection warranty allows you to receive all the updates we'll release for 12 months. The first year is included in the software license. When it expires, you can decide to extend your warranty to continue receiving new features. If you decide not to extend it, you can continue to use the latest version of WebSite X5 you installed, forever.

Minimum system requirements

Perfect on Windows 7, SP1, 8, 10 | Min. Screen resolution 1024 x 720. Compatible with Windows and Linux servers. PHP 5.6 and MySQL 5.6 required only for certain advanced features. Internet connection and e-mail account necessary for activation.
