

PCAM-201

Mini Lip-Mount Camera

This CMOS camera's compact design makes it easy to discreetly install on nearly any vehicle, giving the driver a much enhanced view of their surroundings for safer, easier driving. With an IP67 water/debris-proof rating, it's built to last, standing up to dust, water immersion, and other environmental hazards.

Parking lines give you some much-needed extra help in tricky parking situations where backing out is a delicate process. You'll always see exactly where you're headed, helping you make minor adjustments to prevent accidental collisions. The parking lines are selectable during installation, so you can turn them off when they are not needed.

The selectable image adds to its versatility, mount on the back of a car for a back-up camera, or to the front of your vehicle for use as a front camera.

Actual Camera Size: 1.1 x 1.0 x 1.1" (27 x 26 x 27mm)

FEATURES

- ▶ Sensor Type: 1/4" CMOS
- ▶ Min. Illumination (LUX): 0.5
- ▶ Viewing Angle: 170°
- ▶ Water/Debris-Proof Rating: IP67
- ▶ Parking Lines: Selectable
- ▶ Image (Mirrored / Non-mirrored): Selectable

INCLUDED IN THE BOX

- ▶ Camera
- ▶ Wiring harness
- ▶ Hole saw
- ▶ Mounting hardware
- ▶ RCA Adapter
- ▶ Manual
