Let's illuminate what your Smart Switch can do:

①

Create the perfect lighting scene for every scenario.

Go to **C by GE app** and preset the optimal light levels under **create a scene.**

②

Automate your lights to turn on when you come home.

Go to **C by GE app** and schedule times to turn lights on and off under **create an automation.**

③

Control other C by GE bulbs in the room with your switch.

Go to **C by GE app.** Add bulbs and switches to a room under **create a room.**
(sold separately)
