

# SPV-65-SXS

6-1/2" Weather-Resistant Coaxial Speaker Pods

## PRODUCT OVERVIEW

Now you can get Alpine sound on a variety of powersport and all-terrain vehicles for an uninterrupted music experience that goes beyond the vehicle.

\*Additional speaker and power wire may be required for installation

## PRODUCT FEATURES

**Go Beyond Utility** – As an easy add-on for select side-by-side and ATV/UTV applications, the versatile SPV-65-SXS speakers include everything you need for an exciting music experience, including two enclosed 6.5-inch coaxial 2-way speakers and a grille-mounted, 1-inch teteron dome tweeter, all weather-resistant against the elements.

**Designed for Various Applications** – The included clamps are durable, with a rotating coated aluminum base that can adjust up to 90-degrees for an optimal listening position. The included folding-style clamps were optimized to fit 1.5" – 2" rails on a variety of powersport and all-terrain vehicles (ATV/UTV).

**Built for the Elements** – Built to handle any driving condition, the weather-resistant SPV-65-SXS can withstand all the elements for an uninterrupted music experience. The speakers are made from rugged, durable fiberglass, finished in a matte black coating, and come with a weather-resistant plug for wiring up your speakers. The rotating aluminum base is coated for protection against the elements.
