PARTS OVERVIEW

CONNECTING TO YOUR COMPUTER

Connecting your USB-C to SATA adapter to your computer

- 1 Connect the SATA connector to the SATA jack on your 2.5" SATA HDD (hard disk drive) or SSD (solid-state drive).

- 2 Connect the USB-C connector to a USB-C port on your computer.

- 3 If you're connecting a new hard drive, see "FORMATTING YOUR HARD DRIVE" for setup instructions.

TROUBLESHOOTING

I can't find the additional drive on my computer:

- Make sure that your drive is functioning.
- Make sure that the USB-C cable is firmly connected to your drive.
- Make sure that the USB-C cable is not damaged.
- Try using a different USB-C port.
- Restart your computer.
- Make sure that your drive is compatible. This adapter does not support IDE or 3.5" drives. It also only supports drives requiring 5V (max.) of power.

My data transfer is slow:

- Make sure that your computer's drivers are up to date.
- Try using a different USB-C port.
- Older drives may be slower due to physical limitations. This is normal.
