SETUP

1. Charge the Projector

- A. Connect the adapter to the micro USB port of the projector, using the included power cord.
- B. Plug the adapter into an outlet or other power source.
- C. You may now use the projector.
- D. While plugged in, the projector's battery will automatically charge. It is recommended that you allow the projector to charge for at least 4 hours before using it in battery mode for the first time.

2. Turn on the Projector

Press and hold the power button for 5 seconds to turn on the projector.

3. Adjust Screen Size

The screen size will increase or decrease as the projector is brought closer or further from the wall.

4. Adjust the Focus Wheel

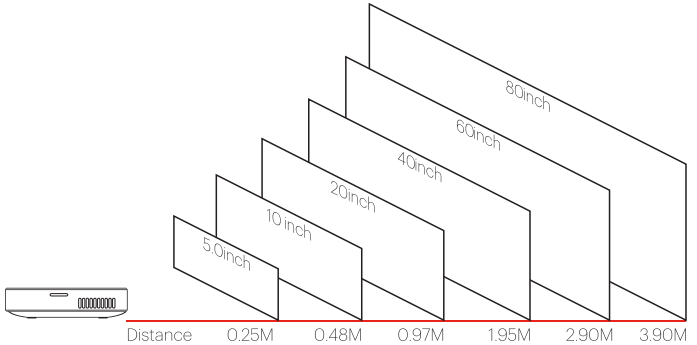

Open a still image and carefully rotate the focus wheel until the image is clear.

5. Connect to a an External Device

Your projector can be connected to a variety of external devices using the included HDMI® cable. Compatible devices include laptops, smartphones, tablets, gaming devices, and more.

- A. Connect one end of the HDMI® cable to the projector.
- B. Connect the other end of the HDMI® cable to the external device.

**NOTE:** Some devices may require an adapter in order to connect to the projector. Check the table in the online user manual if using a device that is not HDMI® compatible.
