# Before You Start

⚠ Please read all instructions carefully.

⚠ Retain instructions for future reference.

⚠ Seperate and count all parts and hardware.

⚠ Read through each step carefully and follow the proper order.

⚠ We recommend that, where possible, all items are assembled near to the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.

⚠ Always place the product on a flat, steady and stable surface.

⚠ Keep all small parts and packaging materials for this product away from babies and children as they potentially pose a serious choking hazard.

Detachable to adjust inner space

Product Specification:

Model no	EP24414US/EP24414AU
Capacity	55L
Power supply	DC 12V/24V AC 100-240V (with adaptor) 50-60Hz
Input voltage	12V/24V
Rated current for DC	3.75/1.875A
Color	Gray and black
Power	45W
Size	69x34.5x52.4 cm
Temperature range	-4°F to 68°F in ambient temperature of 77°F

Model no	EP24413
Capacity	50L
Power supply	DC 12V/24V AC 100-240V (with adaptor) 50-60Hz
Input voltage	12V/24V
Rated current for DC	4.1A/2A
Color	Gray and black
Power	50W
Size	72.3x36x45.8 cm
Temperature range	-4°F to 68°F in ambient temperature of 77°F

Troubleshooting

Fault	Solution
Refrigerator is not working	Check if power supply is malfunctioned not not. Check if the plug and socket are connected well. Check if the fuse is burnt or not. Compressor starts delay protection for 3 mins after switching on.
Water flowing sound from the refrigerator	It is the flowing sound of the refrigerant which is normal phenomenon.
The compressor is slightly noisy when starting	The noise will be less after the compressor works stably which is normal.
F1 code display	It is protection mode of low car voltage which can be solved by setting battery protection button from H to M or from M to L.
F2 code display	It is the protection mode of overloaded fan. Please turn it off and restart it after 30 mins.
F3 code display	It is the protection mode of frequent working compressor. Please turn it off and restart it after 30 mins.
F4 code display	That means compressor is overloaded or working at a low speed. Please turn it off and restart it after 30 mins.
F5 code display	It is the protection code of overheated compressor module. Please move it to a ventilated area, turn it off and restart it after 30 mins.
F6 code display	No parameter can be detected by the controller. Please restart it.
F7 or F8 code display	It is the erroneous protection code of temperature sensor. Please check the sensor terminal.

Attention

- Make sure to connect power to the suitable voltage socket.
- The refrigerator can be switched on after being unpacked and left on the ground for more than 6 hours.
- Keep the refrigerator horizontal when it is running. The tilt angle much be less than 5° for long time running and be less than 45° for short running.
- The refrigerator must be well ventilated for heat dissipation.
- The refrigerator should be placed somewhere well-ventilated away from heat source.
- Do not turn the refrigerator upside down for drainage.
- Do not expose it to rain or soak it in water.
