

NG2 ELECTRIC SKATEBOARD

SWAGTRON Swagskate NG2 A.I.-Powered Electric Longboard with Hands-Free Control

The thrill of a traditional longboard with none of the compromise. That's the Swagskate NG2 electric longboard from SWAGTRON® in a nutshell. Dynamic, intuitive and simple, with the options you need to have the absolute best riding experience possible. No tricks. No gimmicks. Just a pure, exhilarating fun.

Experience the most advanced e-board deck we've ever developed. We've combined six layers of maple with two layers of bamboo to achieve the optimal blend of strength, flexibility and responsiveness in a lightweight design. The spacious 38.6-inch deck accommodates riders up to 220 pounds. But this alone is not what makes the NG2's deck special.

The Joys of Hands-Free Riding

Longboarding is all about balance and skill, getting in tune with the pavement. That doesn't change just because we've attached a robust pair of powerful motors to the board. With the NG2, you'll focus on what's important — the road and the ride.

Intelligently designed balance and weight sensors deliver true longboard riding experience. The NG2 features an intuitive **A.I.-powered somatosensory control system**. It's advanced technology that harkens back to traditional longboarding, letting you ride **completely hands-free** without the need for a remote.

Simply lean forward on the front sensors to move forward and accelerate. Ready to slow down, stop or reverse? Just lean back. It's that simple. The high-performance smart sensors are optimized and calibrated to register and respond to shifts in weight with pin-point accuracy and near-zero lag.

Specifications:

Net Weight: 20 lb. (9.1 kg) | **Dimensions:** 38.5 x 11 x 5.7 in. (980 x 280 x 145 mm) | **Max. Load:** 220 lb. (100 kg) | **Deck Materials:** maple (6 layers), bamboo (2 layers) | **Wheels:** ø90 x 52mm | **Wheel Materials:** PU | **Motor:** 450W x 2 | **Battery:** 43.8V 3.1Ah (lithium-iron) | **Charging Time:** ~2 hours | **Mile Range*:** 11.8 mi (19 km) | **Max. Speed*:** 18 MPH / 30 km/h | **Climbing Capacity*:** 15° | **Additional Features:** somatosensory control system (body control), multiple riding/speed modes, wireless remote control

** Performance specs based on rider weight of 143 lb. (65 kg). Performance, including travel distance, climbing capacity and top speeds, will vary based on rider weight, pavement quality, wind speed, riding style and other factors.*

ALL ABOUT 'THE LEAN'

A.I. POWERED BALANCE CONTROL /
HANDS-FREE OPERATION: NO REMOTE REQUIRED

INCLUDES OPTIONAL FULL-FEATURED REMOTE

SPEED CONTROL / MODE SWITCHING / MOTOR REVERSE

Control in the Palm of Your Hand

While we engineered the NG2 to be hands-free, we couldn't ignore the countless riders who absolutely love using remote controls with their electric longboards. We could, however, improve the experience of using the remote — which is exactly what we did. The NG2's remote is designed to fit so naturally, you'll forget that you're holding it. That is, until you use it. And every aspect of the ride is controllable from the remote, from accelerating to switching riding modes. Hands-free or remote control: the choice is yours.

WORD-CLASS SUPPORT

90-day limited warranty. Expert customer support specialists. Professional after-sales how-to and FAQ videos. Our relationship doesn't end after we deliver your Swagskate NG2 electric longboard. If you have questions or concerns, simply reach out via phone, email or chat online to our support team — fully staffed in the U.S.

Your Own Pace

Tailor the NG2 to fit your comfort level. First time on an e-longboard? Need some time get used to the controls? Use the full-featured remote to switch riding modes and cap the top speeds until you're ready for boosted adventure.

2 X 450W
MOTORIZED WHEELS

Built to Perform

Faster speeds. Tighter turns. Smoother motion. Robust dual rear motors deliver a massive amount of power, while the extra-large, extra-wide 90x52mm wheels offer superior stability and maximize rider agility.

Ride More, Charge Less

No power? No problem! The brushless motor lets you continue riding the NG2 with smooth coasting that feels as natural as riding a traditional board. And the fast-charging high-efficient Li-iron (LFP) battery fully recharges in ~2 hours.
