

## Max LP IN BLACK

USB Conversion Turntable with Built-in Stereo Speakers

### Listen to great music and convert your tunes into digital files!

- All-in-one turntable with built-in stereo speakers
- Connects to computer via USB and converts records or other audio into digital files
- Plays 33 $\frac{1}{3}$ , 45, and 78 RPM records
- Headphone jack for private listening
- Includes EZ Vinyl/Tape Converter software CD
- $\frac{1}{8}$ -inch (3.5mm) aux input to connect external devices
- RCA outputs for easy connection to other equipment
- Includes protective dust cover, 45 adapter, and felt slipmat
- Glossy Piano Black Finish

Here's a beautiful turntable that does it all! Actually, Max LP just looks like a turntable. It's really a complete sound system with built-in stereo speakers and an internal amplifier. Play any record in your collection—7", 10" or 12"—and enjoy clear, vibrant sound without needing any external equipment.

Plus, Max LP includes our EZ Vinyl/Tape Converter software. It converts any record into a digital file on your computer and connects easily with the included USB cable. This versatile unit also has a  $\frac{1}{8}$ -inch Aux input so you can connect any other device you own—like a cassette player—and play it through Max LP's speakers. You can even convert the audio of your external device to a digital file. When we say "All-in-One," we mean it!
