

7 TIPS FOR PROPERLY LOCKING YOUR BIKE

KRYPTONITE®

1

ALWAYS LOCK YOUR BIKE TO A SOLID OBJECT THAT IT CANNOT BE LIFTED OVER.

2

LOCK YOUR BIKE IN A WELL-LIT AREA WITH HIGH FOOT TRAFFIC.

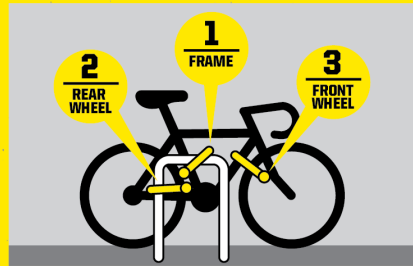

3

MAKE SURE WHAT YOU LOCK TO CANNOT BE CUT.

4

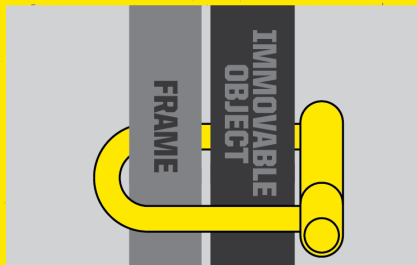

LOCK ACCORDING TO VALUE.
Frame first, then back wheel, and finally front wheel.

5

GET THE TIGHTEST FIT POSSIBLE!

The less room inside of the u-lock or chain, the more difficult it will be for thieves to use their tools.

6

POSITION YOUR LOCK OFF THE GROUND WITH THE KEYHOLE FACING DOWN.

7

CHOOSE THE RIGHT LOCK!

The level of security you need depends on where you are leaving your bike, and for how long.

Head over to our [How To Choose A Lock](http://HowToChooseALock) page at Kryptonitelock.com for more information.
