

PHANTOM FLOWER

Are you looking for more cool tricks for your Phantom?! Create a Phantom Flower!
We used Mystic Glacier, one of our UV Reactive Phantom colors, to make this guide.

- 1 Remove your Thinking Putty from the tin and stretch it out.
- 2 Using the Glow Charger(TM), draw a design on the putty.
- 3 Take one end in each hand, and swirl the putty into a flower shape.
- 4 When you're done, take it outside and watch as your Phantom flower blooms in a different color!
