DIMENSIONS & WEIGHT CAPACITY

Step 1

Clamp Installation Option

• Clamp Installation Instructions: Open the clamp to be wider than the width of the desk then slide the clamp into place in the desired location. Tighten the clamp back down using 6mm Hex Wrench (#L) until it is secure. Slide the Cable Management Clip (#F) into place as shown.

Grommet Installation Option

• Use 6mm Allen Key (#L) to remove the bolt from the center of Mount Base (#C). This will also detach the lower clamp portion. Store the removed parts to be able to convert the mount to a clamp configuration.

• A grommet hole of 10-60mm is required for installation. If a grommet hole is not present in your desk surface, use a 3/8\"

• Place the Mount Base (#C) over the grommet hole and insert Grommet Bolt (#J) through the desk and connect To grommet Plate (#E) on the underside of the desk. Tighten with 6mm Allen Key (#L) until secure. Slide the Cable Management Clip (#F) into place as shown.

Step 2

Insert the Vertical Pole

- Use the screwdriver end of 4mm Hex Wrench (#K) to partially loosen the two bolts on the top of the Clamp Base. Do not remove the bolts, stop loosening once bolts are loose enough to allow the pole to be installed.
- Insert the threaded end of the Pole (#H) into the mount base and twist the pole until it is secure.
- Tighten the two bolts back down to secure the pole into place.

Step 3

Install the Arm Connector

- Attach the Cable Management Clip (#I) to the vertical pole approximately halfway between the base of the pole and the desired location for the Arm Connector.
- Use 6mm Hex Wrench (#L) to partially loosen the bolt on the Arm Connector (#G).
- Slide the Arm Connector onto the vertical pole in the orientation shown, and hold it at the desired height.
- Tighten the bolt back down until it is secure and to fix the arm connector in place.

Step 4

Attach the Swivel Arm

- Using the screwdriver end of 4mm Hex Wrench (#K) partially loosen the bolt on the outer end of the arm connector.
- Insert the Swivel Arm (#B) into the end of the arm connector.
- Tighten the bolt back down to prevent the removal of the swivel arm.

Step 5

Attach the Spring Arm

- Using the screwdriver end of the 4mm Hex Wrench (#K) partially loosen the bolt on the end of the swivel arm.
- Insert the Spring Arm (#A) into the end of the swivel arm.
- Tighten the bolt back down to prevent the removal of the spring arm.

Step 6

Attaching the VESA Plate

- Select the appropriate size mounting bolt (Select one size #M-A or M-B) and washer (#M-C) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your monitor user manual or contact the monitor manufacturer for sizing information. Attach the VESA Plate using the selected bolts and tighten until secure. Do not overtighten.

Step 7

Connect the Monitor to the Spring Arm

- Turn the knob on the top of the VESA plate so that it is perpendicular to the monitor and the arrows are pointing to the image of the unlocked lock.
- Slide the monitor and VESA plate into place on the end of the spring arm. Take care to not drop the monitor too quickly before the gas spring tension is adjusted as shown in step 9.
- Turn the knob so that it is parallel to the monitor and the arrows are pointing to the image of the locked lock.

Step 8

Cable Management

- There are covers for the cable management system on each segment of the mount arm. Remove them by sliding the cover away from the center of the mount (do not pull or pry them away from the arm or the cover will be damaged.) Route the cables beneath the covers and slide them back into place.

Step 9

To properly balance the arm with monitor mounted, adjust the spring tension using the supplied Allen Key as follows:

First, position and firmly hold the arm horizontally as shown. Ask for assistance should you require it.

CAUTION: To avoid damage to monitor or mount, always keep the arm in a horizontal position while making adjustments. Again, ask for assistance if required.

If the arm **drops**, turn the adjustment screw counter-clockwise until it stays in a horizontal position.

If the arm **rises**, turn the adjustment screw clockwise until it stays in a horizontal position.

CAUTION: DO NOT over tighten the screws.

Final Adjustments

Note: If the display does not stop at your desired position, tighten the screws as shown.

Note: If the display does not stop at your desired position, tighten the screws as shown.
