SETTING THE LIGHT UP

-   While holding the lamp with the LED's face down insert the top of the lamp into the clip as shown in the diagram.

-   Connect the provided type C power cable into the lamps power port located on the back of the lamp. Connect the other USB end into a USB power supply.

After install

-   Place the base on the upper center of the monitor while making sure the clamp is firmly secured, and the ball base is against the back of the monitor.
