### TROUBLESHOOTING

Having trouble completing the guided setup?

Don't worry, it's usually an easy fix.

If you cannot see a picture on your TV:

- Make sure your TV and the device you want to watch (cable box, Blu-ray player, game console, etc.) are turned on and plugged into a working wall outlet.
- Make sure your power cable is connected.

If you cannot connect to your wireless home network during guided setup:

- Make sure the correct wireless network name is selected.
- Make sure the wireless network password is correctly entered (password is case sensitive).
- Improve the wireless signal by rotating the router slightly (even a few inches can help).

If you cannot hear sound:

- Make sure the TV volume is turned up and not on mute.
- Try only the TV speakers by disconnecting any connection to audio devices (like headphones or audio video receivers).

If the TV remote control isn't working:

- Remove any obstruction and point the remote at the TV's remote control sensor (see FEATURES).
- Try a fresh set of batteries.
- If the status light on the front of your TV flashes once each time you press a remote button, the problem is not with the remote.
- Unplug the TV and plug it back in.
