## Before You Start

- ⚠ Please read all instructions carefully.
- ⚠ Retain instructions for future reference.
- ⚠ Separate and count all parts and hardware.
- ⚠ Read through each step carefully and follow the proper order.
- ⚠ We recommend that, where possible, all items are assembled near to the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.
- ⚠ Always place the product on a flat, steady and stable surface.
- ⚠ Keep all small parts and packaging materials for this product away from babies and children as they potentially pose a serious choking hazard.

## Characteristics of our products:

Mini Thermoelectric Cooler and Warmer is popular with drivers and field operators in some developed countries in Europe, America and so on. It can bring you cool drinks in hot summer and warm food in winters with cold wind blowing. No matter in outdoor hiking traveling by car or in traffic jam, you can enjoy plenty of drinks and foods at a proper temperature.

This cooler and warmer may be carried on your back or in hand for its lightweight. Matching with AC or DC transformer attached, it can be used indoors, especially for students to store cool and hot drinks and foods in their own room. If it is placed in hotel, office or sitting room, its graceful design, beautiful appearance, luxury style and extraordinary applicable function, will bring you a sense of ease and comfort when you are holding a cup of cold drink in your hand after work.

It integrates dual functions of cooling and heating by employing semiconductor, without compressor or cryogen. It has advantages of being free from pollution, small volume, lightweight, portability, long service life and lowest power consumption.

## Application:

- for holding banquet beside the lake
- for picnics and on camping trips
- for taxi drivers
- In students' dormitory or dining hall
- on the playground
- in the office
- at the construction site
- for traveling by cars
- on yacht outing or go fishing
- on a van, truck or tour bus
- for storage of medicine at a low temperature
- for preservation of fresh milk and warm food
- for home bar

**Work performance:**

To obtain optimized cooling effect, we suggest putting in per-chilled foods and drinks. It will take 2 or 3 hours for cooling the unfrozen foods or drinks. The cooler and warmer is not designed to heat cold food but to preserve hot foods at awarm temperature. If necessary, it can heat the foods with more than 2 hours.

If it's applied properly following the direction, the temperature of foods can be kept for hours.

**Operation Guide:**

1. Insert the plug of the power cord into the socket of the unit, or insert the DC power cord into the cigarette lighter in the car.
2. Tap the ON/OFF to turn it on, tap and hold the button to turn it off.
3. Tap SET to settle the mode, use the UP and DOWN arrow buttons to set the flashing number to your desired temperature. The green indicator will be on indicating the unit is in cooling mode, the red indicator will be on indicating the unit is in heating mode.

**Attachment: the different use between outdoor and indoor:**

**When car power is used (DC 12V, the appliace of products is subject to the types of cars.)**

1. The car engine is required.
2. Insert the plug of DC power cord into the socket of the lighter in the car.
3. Shift the power switch to the DC side.

**When the household power is used (AC 120V)**

1. Connect the AC power cord (household power cord) with the household socket of the product.
2. Insert the power socket into the concentric plug.
3. Turn the power switch to the AC side.

**WARNING AND NOTICE**

FOR THE PROPER OPERATION, PLEASE READ THE BELOW-STATED CAREFULLY BEFORE USING THE APPLIANCE. MISUSE OF THE APPLIANCE WILL CAUSE THE DEATHES AND INJURIES OF PERSON AND THE APPLIANCE BROCKEN.

1. Prevent the fans from being stuck. The fans being stuck will heat the engine and cause fire. The towel, cloths and the like shall not be put on it.
  2. Please confirm the sockets of the cords to be tight. The loose socket will result in the cords and sockets heating and broken, even fire.
  3. Keep the appliance away from the flammable items and dampness to prevent the explosion and fire.
  4. Don't break up or refit the appliance.
  5. Don't switch the function of cool/warm abruptly. Switch the function after 30 minutes of being on OFF.
  6. Don't rinse it with water.
  7. Prevent the appliance from being upside down.
  8. Please don't drop or shock it.
  9. The appliance shall not be exposed to rain.
  10. Children should be supervised to ensure that they do not play with the appliance.
  11. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
  12. Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
  13. Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
  14. The appliance is equipped with type X attachment having a specially prepared cord, if the supply cord is damaged, it must be replaced by a special cord or assembly available from the manufacturer or its service agent.
- This appliance is intended to be used in household and similar applications such as:
- staff kitchen areas in shops, offices and other working environments;
  - farm houses;
  - by clients in hotels, motels and other residential type environments;
  - bed and breakfast type environments.
