

Transform your TV into a digital photo frame.

PicStick

Wireless HDTV Photo / Video Viewer
with Remote Control

For use with the Frametime
smartphone app

iOS | Android

The PicStick takes the frame out of digital photo frame by revolutionizing photo sharing and viewing. Transform your big screen TV into a digital photo frame by displaying your photos and videos on your HDTV straight from your smartphone. With a simple setup and WiFi connection, you can effortlessly create captivating photo slideshows of a recent family vacation or share a video of an important family milestone for yourself or for family members who live in another part of the world.

Plug in the PicStick to your TV's HDMI port, connect the power supply and then connect to a WiFi network. Download the Frametime app on your Apple or Android smartphone. Select photos and videos from your smartphone and send them to the PicStick to be displayed on your chosen TV or monitor. With the PicStick's built-in memory (media files are not stored in a cloud) you can store thousands of photos and videos and manage your files through the app's interface with the included remote control directly on your TV. Enjoy the convenience of privately and securely sharing your precious memories anytime, anywhere.

Remotely share photos and videos from anywhere in the world.

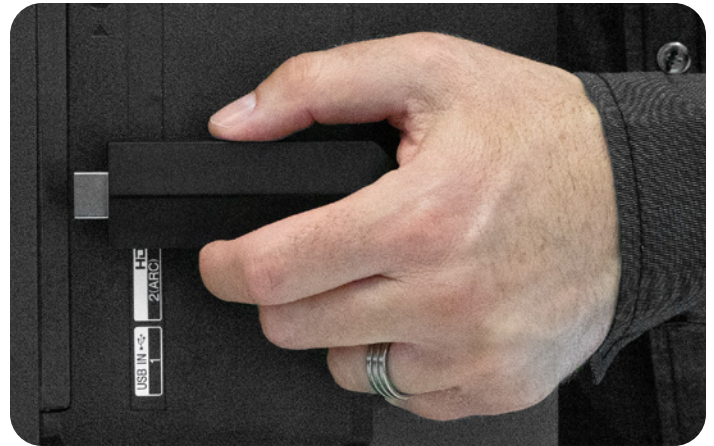

Wireless Photo & Video Sharing

The PicStick revolutionizes photo viewing and sharing by turning your HDTV or monitor into a digital photo frame. Send photos and videos securely from your smartphone to any screen.

Easy to Configure with App Support

Download the Frametime app on your Apple or Android smartphone. Account set-up and synchronization is quick and easy. Simply plug in the PicStick into an available HDMI port. No subscriptions or in-app purchases.

Extra Media Accessibility

Have media files you'd like to share that aren't on your phone? Simply plug in a USB thumb drive to the USB port on the back of the PicStick to access and share photos, videos and even audio files.

Digital Signage Solution

The PicStick makes for a great way to present photo slideshows or a video message for business meetings, school lessons, special events, restaurant menu boards, etc.
