# GETTING STARTED

## QUICK START GUIDE

Ultimate Ears BOOM 3 Unboxing and Onboarding: [youtu.be/ShMG0okeU6o](https://youtu.be/ShMG0okeU6o)

## INSIDE THE BOX

- MEGABOOM 3
- Quick charging adapter
- Micro USB cable

## GET STARTED

### 1. Power on the speaker

Short press the power button to turn on your MEGABOOM 3.

### 2. Pair your phone to the speaker

Press and hold the bluetooth button to put it in the pairing mode.

Go to Bluetooth setting on your phone and select MEGABOOM 3 to connect.

### Use the Magic Button

Use the Magic Button to control your music.

Short press to play and pause.

Double press to skip a track.

### Charge your speaker

Lift the weather door to charge using the USB cable

You can also charge your speaker by placing it on POWER UP charging dock (sold separately).

### Check battery level

Simultaneously press the “+/-” button to check battery level.

### Adjust volume

Press the “+/-” button to increase/decrease volume.

### Download app

Download the ULTIMATE EARS BOOM AND MEGABOOM app to explore the other great features such as Remote Power ON/OFF, Equalizer, PartyUp, and using Magic Button to set up your playlists.

### DIMENSIONS

Diameter: 87 mm (3 3/8").

Height: 225 mm (8 7/8").

Weight: 925 g

---

<sup>1</sup> \*\*Actual battery life will vary with use, settings, and environmental conditions.

## FAQs

- Do I need to clean my speaker after using it in or around water?

Always thoroughly rinse and dry your speaker, micro-USB port and charging ring with fresh water after using it in a swimming pool or the ocean. While the speaker is waterproof, the chemicals and salt in your pool or the ocean can damage the waterproof seals over time if not rinsed off after use.

- Can I use my speaker to make phone calls?

No, MEGABOOM 3 doesn't support voice calls.

- Does my speaker have a voice assistant feature?

No, MEGABOOM 3 doesn't have a voice assistant feature.

- Can I stream music through the auxiliary port?

No, MEGABOOM 3 doesn't have auxiliary ports.

- The app does not recognise the speaker in iOS 13

After updating to iOS 13, you will need to allow the app to access Bluetooth. To do so, in your iOS Settings, go to your speaker's app settings and turn on the Bluetooth access.

In case you have installed the app after the iOS update, you will be prompted with a message requesting Bluetooth access for the app. In this case, just click on "OK" to give access.

- Music drops out occasionally

If you're having trouble with audio distortion or drop-outs on your speaker, try these suggestions:

- Move the audio source closer — it might be out of the range of your speaker.
- Move away from other sources of wireless signal (microwave, routers, cordless phones, etc.) — you could be experiencing interference.
- Make sure your speaker has enough battery power (connect it to a power source with the supplied adapter).
- Adjust the volume on both the audio source and your speaker.
- Restart both your speaker and the audio source.
- Re-pair your device with your speaker.

**NOTE:** If you're streaming audio content from the internet, the issue could be with the internet connection and not your speaker.

- I can't connect to my device

If your Bluetooth device won't connect to your Ultimate Ears speaker, try the following:

- Make sure your speaker is turned on.
- Make sure your device is paired with your speaker and Bluetooth is active.
- Place your Bluetooth device closer to the speaker — it might be out of range.
- Move your Bluetooth device and speaker away from other wireless sources — you could be experiencing interference.
- Turn your speaker off, and then back on again.
- If you have multiple speakers, make sure you're connected to the correct one.

**NOTE:** If this is the first time you're pairing a device with your speaker, you don't need to press the Bluetooth connection button. It comes out of the box ready to pair.

- Having charging issues with MEGABOOM

Your MEGABOOM can sometimes get into a state where it doesn't charge. To get your MEGABOOM back to a normal charging state, do the following:

1. Connect your speaker to the charger and leave it connected for a few seconds.
2. If the charge LED fails to pulse continuously, disconnect the cable from your speaker, then reconnect it, and leave it connected for a few seconds.
3. Repeat steps 1 and 2 until your speaker gets to a normal charge cycle - the LED should continue to pulse. (This could take up to 25-30 times.)
4. Once your speaker gets to a point where it charges normally, continue to charge it until the battery is at 100%.

Be sure to update the firmware on the speaker so that the issue does not re-occur. To update your MEGABOOM software:

1. Download the latest app for your speaker.
2. Connect your speaker to your smartphone and open the app.

3. Tap More, then tap the update prompt.

- [Having pairing issues with MEGABOOM](#)

If your Bluetooth device won't connect to your MEGABOOM, try the following:

- Make sure your device is paired with your speaker and Bluetooth is active (see "How do I pair additional Bluetooth devices with my MEGABOOM?").
- Place your Bluetooth device closer to the speaker – it might be out of range.
- Move your Bluetooth device and speaker away from other wireless sources – you could be experiencing interference.
- If you have multiple MEGABOOM speakers, make sure you're connected to the correct one.
- The MEGABOOM can be connected to up to two devices at a time – make sure you don't already have two devices connected.
- Turn your MEGABOOM off, and then back on again.

**NOTE:** If this is the first time you're pairing a device with your speaker, you don't need to press the Bluetooth connection button. It comes out of the box ready to pair.

- [How To Use The Ultimate Ears Boom App](#)

The Ultimate Ears BOOM app has everything you need to get the most out of your Ultimate Ears speaker. From #PartyUp to customizable EQ, unlock even more awesome ways to use your speakers.

- [One App](#): Use one app to access speaker features for all BOOM and MEGABOOM speakers. Works with BOOM, BOOM 2, BOOM 3, MEGABOOM and MEGABOOM 3, and HYPERBOOM.
- [Customize the Name of your Speaker](#): Have fun with it and make it easier to find in your device list.
- [Remote On/Off](#): You'd never walk all the way to your TV to turn it on and you shouldn't have to with your wireless speaker either. Use the app to turn your speaker on/off from afar.

- One Touch To Your Playlists: Follow the on-screen instructions to select your playlist from Apple Music (iOS only) or Deezer premium (Android Only).
- Adaptive EQ control: (HYPERBOOM only). Turn On or Off this smart EQ feature that automatically adjusts HYPERBOOM's sound signature for the best sound depending on its environment.
- EQ: You Control the Sound: Want to bump up the bass for your next party? Customize your beats in the app. You control the atmosphere with the recommended presets or customize the EQ to your listening preferences.
- PartyUp: Pair up to 150 speakers for the ultimate sound experience. You can pair any BOOM or MEGABOOM together. To pair your speakers together, every speaker must be updated with the latest speaker Firmware (check the app to ensure your speaker has the latest firmware).
- Alarms: Don't be late again. Choose your favorite music to wake up to.
- Speaker Updates: When new software is available for your speaker, a simple tap in the app updates your speaker with the latest features in no time. Your speaker keeps getting better with the in-app updates.

To set up the app for your speakers:

Connect your speaker to your smartphone, tablet, or any other device using Bluetooth. For help, see Connecting your speaker to your device.

Download the BOOM app from the Google Play store or the App Store.

Open the app once it's installed. You'll see a screen with your speaker name, speaker image, the features available for your speaker, and access to speaker settings. You are now ready to use the app to take advantage of all the features of your speaker.

## WARRANTY – MEGABOOM 3

[2 year limited hardware warranty](#)
