

HEIGH10 RGB CONTROL

UART HARNESS FOR HEIGH10 AND SPXDBC

Control Stinger SPXD lighting from your HEIGH10! Change colors, turn your lights on/off, LINK your lights to match them to your HEIGH10 illumination color, select AUTO to turn your SPXD lights on/off with your vehicles headlights.

Designed for SPXD

Control any of the enLIGHT10 SPXD lighting from your HEIGH10.

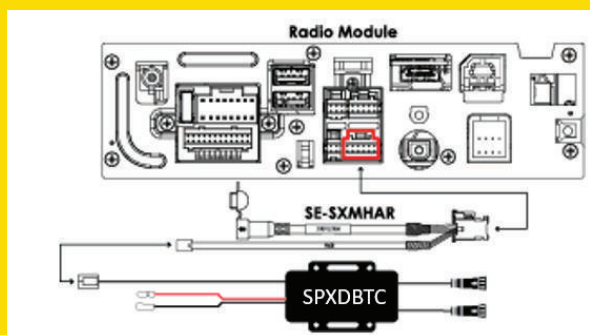

Customization

Endless color options to choose from or Link your SPXD lights to match your HEIGH10 illumination color.

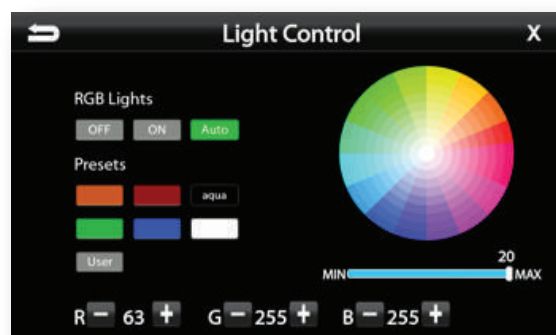

Always in Control

Change your lights from your HEIGH10 or from the enLIGHT10 by Stinger app on your smartphone.

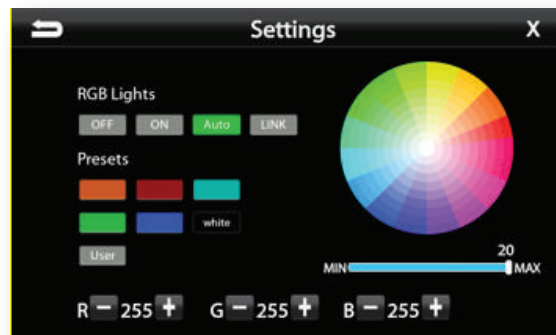

- **RGB Light Control** has been added to the Home screen of the HEIGH10

- **Light Control** allows you to turn your light on/off
- Pick from any preset light colors and adjust brightness
- Use the color wheel to choose your favorite color and use the User tab to lock in your color
- Use the RGB numbers to dial in a color

- Choose illumination color

- When choosing **LINK** from the HEIGH10 you can now have your SPXD lights change to the same illumination color as selected for your HEIGH10 display

- When Auto is selected your SPXD lights will turn on with your headlights
