Some states do not allow the exclusion or limitation of special, incidental, or consequential damages, so the above limitation may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

PG2 PERSONAL TRIMMER

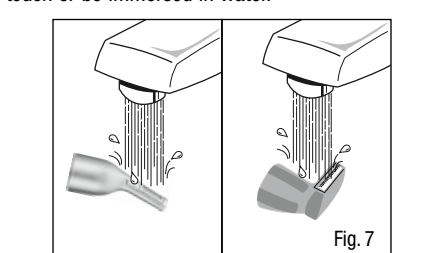

- All-purpose 20mm trimmer attachment
- On/off slide switch
- Battery compartment on back
- Angled detail trimmer attachment for nose, ears & eyebrows
- eyebrow comb attachment

CLEANING YOUR TRIMMER

Make sure trimmer is off.

- To remove the trimmer head for cleaning, turn the head counter-clockwise until the "I" mark aligns with the "arrow" mark, then lift the head gently (Fig. 6).

- Only rinse the head under water (Fig. 7). For proper functioning of the unit, the handle can not touch or be immersed in water.

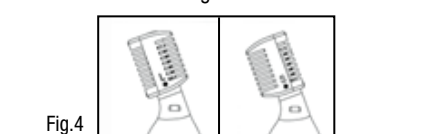

- After cleaning, make sure to shake dry the head before replacing it to the body.

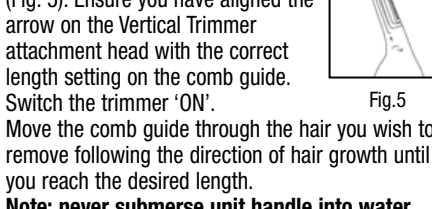

- To reassemble the head onto the body, align the "I" mark on the head with the "arrow" mark on the body and then turn clockwise until the "I" mark aligns with the "circle" mark on the body (Fig. 8).

COMB GUIDE (only to be used on eyebrows)

The eyebrow attachment has two settings; approximately 2mm (S) and 4mm (L). (Fig. 4). Choose the desired length.

Place the comb guide over the Vertical Trimmer attachment head. (Fig. 5). Ensure you have aligned the arrow on the Vertical Trimmer attachment head with the correct length setting on the comb guide. Switch the trimmer 'ON'. Move the comb guide through the hair you wish to remove following the direction of hair growth until you reach the desired length.

TAKING CARE OF YOUR TRIMMER BLADE CARE

Because the trimmer blades are precision made for a very special use, they should always be handled with care. Each time you finish using the trimmer, take a cleaning brush and brush away any loose hair that has collected in the blades, then rinse blades under water only and store the trimmer in its storage stand until the next use.

To promote the long life of the appliance, use your trimmer only for the purpose intended by the manufacturer.

TO TRIM NECKLINE & SIDEBURNS

Attach the all-purpose 20mm trimmer attachment to the trimmer handle. Hold the trimmer blade against the skin at the length desired and move the trimmer downward.

TO TRIM NOSE HAIR

Attach the angled detail trimmer head to the trimmer handle. Turn unit on. Gently insert trimmer head into nostril. Gently move trimmer in and out of the nostril to remove unwanted hair. Avoid inserting the trimmer more than 1/4" to ensure safe trimming.

TO TRIM EAR HAIR

Attach the angled detail trimmer head to the trimmer handle. Turn unit on. Gently insert trimmer head no more than 1/4" into outer ear canal. Gently move trimmer around the outer ear to remove unwanted hair extending beyond the outer ear. Guide the trimmer around the outer surface of ear to trim protruding hairs. Never insert trimmer more than 1/4" into ear canal.

TO TRIM EYEBROWS

Attach the angled detail trimmer to the trimmer handle. Turn unit on. To shape and define, move the trimmer without the eyebrow comb attachment slowly so as not to cut any hair you do not intend to trim. Once shaped and defined, you may thin out the hair using the eyebrow comb attachment.

*Do not use in the shower. To clean simply rinse trimmer blade under faucet.

- To use your trimmer, push On/Off switch upwards to "On" position.
- After you finish using your trimmer, push down on the On/Off switch to turn the trimmer off.
- Always purchase the correct size and grade of battery most suitable for the intended use.
- Replace all batteries of a set at the same time.
- Clean the battery contacts and also those of the device prior to battery installation.
- Ensure the batteries are installed correctly with regard to polarity (+ and -).
- Remove batteries from equipment, which is not to be used for an extended period of time.
- Remove used batteries promptly.
- Store unused batteries in their original packaging, away from metal objects that could short-circuit them. Never short-circuit batteries.
- Never dispose of batteries in fire, except under conditions of controlled incineration. Failure to observe this precaution may result in an explosion. Never attempt to recharge primary batteries as this may cause leakage, fire, or explosion.

GETTING STARTED TO SWITCH TRIMMER HEADS

Hold the handle of the trimmer while turning the trimmer head counterclockwise until the "I" mark is aligned properly with the "arrow" mark (Fig. 2). At this point you should be able to easily lift the trimmer head from the handle. To use a new trimmer head on the unit, properly install the head into position making sure the "I" mark is aligned with the "arrow" mark, turn clockwise until the "I" and "circle" marks are aligned (Fig. 3) and lock into position.

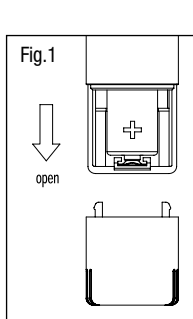

TROUBLESHOOTING

There are several things to look for if your trimmer fails to operate:

- Be sure the trimmer is turned ON.
- Make sure that the battery is properly placed in the battery compartment. Test the battery to be sure it is working.
- Check the blades to see if they are clogged with hair clippings; if so, use a cleaning brush to remove hair.
- If the trimmer still fails to operate, take or send it to a Conair Service Center (see warranty procedure and addresses).

OPERATING INSTRUCTIONS

- To insert battery, remove compartment cover at the back of the unit by pulling straight down (Fig.1). Insert one AA alkaline battery, negative end up. (Alkaline batteries will ensure the best performance and longest life for your appliance.) If you are not going to use the unit for a long period of time, or if the battery is dead, remove the battery from the unit. Remove used batteries promptly. This will increase the life of your trimmer.
- After inserting the battery, replace the battery compartment.
- Now your unit is ready to be used.
