

Model One®BT shown in Walnut/Beige

## Model One® BT AM/FM Table Radio

**Plug it in. Turn it on. Tune a station.**

**You can't get much simpler than that. Or can you?**

With Tivoli Audio's Model One BT with *Bluetooth* wireless technology, simply switch to the Auxiliary position and after initial pairing, start listening to your favorite music wirelessly. It's that simple.

With the addition of *Bluetooth* wireless technology, when you're not listening to our world-famous analog AM/FM tuner, you can listen to the music stored on your *Bluetooth* wireless technology-enabled device. You'll never tire of hearing your music through the Model One BT thanks to *Bluetooth* wireless technology's advanced A2DP profile, combined with the Model One BT's trademark equalization.

Since *Bluetooth* technology is *wireless*, you won't have to dig out an audio cable for your enabled-device every time you want to listen to your music through the Model One BT. But don't worry, the Auxiliary input is still on board, along with the Record and Headphone outputs, so you can continue to connect those "old fashioned" wired devices.

The world's simplest radio just got even simpler.

- Play music wirelessly through the Model One BT
- Minimum 9 meter (30') reception range
- Simple to use – no complicated set-up
- Uses *Bluetooth* wireless technology's advanced A2DP profile for high-quality audio
