

S3 Floor Stand

High-performance stands

The S3 Floor Stand provides the best possible platform for the R3 Meta HiFi speakers to perform. Featuring a mounting system that rigidly mounts the loudspeaker upon the stand, integrated cable management to ensure your cables are concealed and organised, a pillar that can be loaded with inert filler to further improve stability, and spike discs to protect wooden floors, these are exceptionally well-considered stands for an exceptional loudspeaker.

The perfect platform for performance

The S3 Floor Stand has been engineered to maximise the acoustic performance of the R3 Meta. It not only supplies a solid platform for the speaker to work from, its dimensions have been dictated by KEF's UK engineering team to ensure it is the ideal height for driver positioning.

Elegant by design

As well as being the perfect acoustic partner for R3 Meta, the S3 Floor Stand is also designed to match it visually, with a complementary rectilinear design that blends seamlessly with the speaker. The S3 Floor Stand is available in three colours, with Slate Grey, Mineral White, and Indigo Matte Special Edition options.

Specifications

Dimensions with plinth (H x W x D)	542 x 260 x 387 mm (21.4 x 10.2 x 15.2 in.)
Weight	6.7 kg (14.7 lb) per stand
Unit measurement	Pair
