Installation Instructions

1. **Turn Off Your Car Battery:** Disconnect the negative (-) terminal to avoid shocks.
2. **Remove Old Speakers:** Take off door panels or grills and unscrew the factory speakers.
3. **Wire the New Speakers:** Connect wires to the new speakers.
Match the positive (+) and negative (-) wires correctly.
4. **Mount the New Speakers:** Insert the speakers into the opening and secure them with the provided screws.
5. **Attach Grills and Test:** Clip on the speaker grills and reconnect the battery.
Play audio to test sound.

Cleaning, Maintenance, and Storage

Cleaning:

- Use a dry microfiber cloth to gently wipe off dust from the speaker grills and cones.
- For stubborn dirt, lightly dampen the cloth with water. Do not use solvents or abrasive cleaners.
- Avoid using compressed air, which may damage the cone material.

Maintenance:

- Periodically check wire connections to ensure they remain secure.
- Inspect the speaker surrounds for wear or cracking—especially in hot or humid climates.
- Keep the area around the speakers clean to prevent debris from entering the cone or grill.

Storage (if not installed or during vehicle storage):

- Keep the speakers in a dry, cool environment away from direct sunlight.
- Store in original packaging or wrap in soft cloth to prevent dust accumulation and physical damage.
- Avoid storing near magnets or devices that may affect the speaker's magnetic components.

Safety Precautions

- Do not overload the speakers beyond their rated wattage.
- Avoid installing in locations with excessive moisture or heat.
- Ensure all wiring is insulated and secure to prevent shorts or damage.

Register Product
