12.0 EU Battery Regulation

This symbol on the battery(ies) or on the packaging indicates that the battery(ies) provided with this product shall not be treated as household waste. Instead, please separate battery(ies) from other types of waste and recycle it (them) through your local recycling system to protect environment and health. When Cd is more than 20ppm or Pb is more than 40ppm, the chemical symbol of the excess substance shall be marked under the separate collection symbol. For more detailed information about recycling of this battery(ies), please contact your local authority or the shop where you purchased the product or battery(ies).

13.0 FCC Compliance Statements

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
RF Exposure Compliance
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

14.0 ISED Compliance Statements

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:
(1) This device may not cause interference.
(2) This device must accept any interference, including interference that may cause undesired operation of the device.
L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:
(1) L'appareil ne doit pas produire de brouillage;
(2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
Cet équipement est conforme aux limites d'exposition aux radiations IC CNR-102 établies pour un environnement non contrôlé. Cet émetteur ne doit pas être colocalisé ou fonctionner en conjonction avec une autre antenne ou un autre émetteur.

15.0 CE-DOC

Hereby, [Manufacturer] declares that the radio equipment type [Model No.] is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: www.tozostore.com

2.5-5.0 W

The power delivered by the charger must be between min 2.5 Watts required by the radio equipment, and max 5.0 Watts in order to achieve the maximum charging speed.

4.0 Operation of earbuds

4.1 How to pair

1. Take out the two earbuds from charging case, they will turn on automatically and link to each other within 10 seconds.
2. The two earbuds flash alternately in red and blue (pairing mode).
3. Search for pairing name [TOZO Tonal Dots] and select it in your mobile.

4.2 Another method of turning on & turning off

Turn on:
Specially designed for modern life, without charging cables, enjoy the convenience of unplugged charging and instant charging.
Turn off:
When the headset is not playing music, press and hold the touch button for about 5 seconds to turn off.

4.3 Clear pairing list

1. Both earbuds are removed from the charging case, long press them for 5s, the red light on 1s and the earbuds are turned off.
2. Long press the left earbuds for 3s, the blue light on 1s to turn on. While red and blue light flashing alternately, triple-click the earbud, the earbud will turn off after the pink light on 1s and red light 1s right earbud operation as above.
Reset is complete when one of earbuds flash red and blue alternately, turn on the Bluetooth to connect again.

4.4 Reset

If only one earbud connect the phone the two earbuds can not pair together, please try the below new reset steps:
1. Delete all [TOZO Tonal Dots] Bluetooth records on your phone, then turn off the Bluetooth.
2. Pick up two earbuds from charging case, then press and hold both earbuds until red lights on to turn off earbuds, and then release fingers (that means press and hold about 5s).
3. Press and hold the both earbuds again, release fingers after blue light fast blink 3 seconds (that means press and hold about 10s).
Reset is complete when one of earbuds flash red and blue alternately, turn on the Bluetooth to connect again.

5.0 Charging

5.1 Charging the Earbuds

1. Put the earbuds into the charging case, they will power off & be charged automatically. When the red LED lights up, it means that earbuds are being charged from charging case.
2. When the Bluetooth headset is fully charged, the charging case will automatically enter the sleep low power consumption state.

5.2 Charging the Charging Case

Please use the 5V/1A adapter to charge the charging case, which can be charged with a computer USB or other USB interface charger.

7.0 Indicator display description

Charging display (that is, the power display when charging the product with an external charger)

When the battery power is between 0% and 33%, the red light flashes
When the battery power is between 33-66%, the pink light was flashing
The blue indicator flashes when the battery is between 66% and 99%
The blue light is always on at 100% power

Discharge display (that is, the product indicates the effect when charging the matching Bluetooth headset)

When the battery power is between 0% and 33%, the red light flashes
When the battery power is between 33-66%, the pink light was flashing
The blue indicator flashes when the battery is between 66% and 99%
The blue light is always on at 100% power

1. Put the earbuds into the charging box, and the charging box will charge the earphones automatically. The corresponding left / right earplug display light on the charging box flashes, indicating that the earphone is charging. The charging box light shows the current power supply, and the battery indicator light goes out after 5 seconds.
2. When the battery power of the charging box is 5 ~ 100%, the digital screen will be on for 5 seconds to display the current power. When the power drops to 0-5%, the digital screen will flash for 5 seconds to display the power level. The digital display goes out when it is not charged.
