X4 HOME

Convenient and Versatile Multi-Device Charging Station

Super Compact Design for the Home or Office Featuring 4 Ports, (Including 2 USB, 1 QC 3.0 QualComm® Quick Charge, and a 1 USB Type-C Port)

Convenience for Home or Office

The X4Home features a unique and innovative design developed exclusively from RapidX. It offers a 24V charging station, which is lower voltage than most comparable 110-240V charging stations on the market. The X4Home was designed as a charging station for the home or office. This unique charging station features a slim and compact solution, which is perfect for the family to curl up on the couch together and read, surf the internet, play games, or watch TV all while charging their devices. The X4Home is also ideal for the office keeping you and all your devices organized.

The X4Home is Highly Versatile

The X4Home also features an extra-long 6-foot cord for added flexibility in a slim and robust black-alloy finish to match your décor and personal style. It features 4 USB ports, including a QC 3.0 (QualComm® Quick Charge) port for fast charging, a 1 Type-C port for a laptop or Type-C device, and 2 regular USB-A ports, allowing you to charge a wide variety of devices. The X4 Home can also be used in countries using 240V outlets.

The X4Home was designed with a Lower Voltage Station

The X4 Home is a 24V power station, which is below the 50V+ hazardous safety and standard regulations. The X4Home separates the main power source, (110V), from the charging station to an external power adapter. Compared to other charging ports on the market that run the 110V+ into the actual station, the X4Home offers a better solution for the home or office environment.

THE SPECS

Input: 110V-240V
The charging station is 24V max
Output: Total 5V/6A-33W max
Single port use output details:
1 QC 3.0 port: 5-6V --3A
2 Standard USB A: 5V/2.4A max
1 USB Type C port: 5V/3A max
Cable length: 6 feet
