

# Acronis

## True Image 2021

### The World's #1 Personal Cyber Protection Solution

**Acronis True Image delivers easy, efficient, secure cyber protection.** The only personal solution with a unique integration of reliable backup and cutting-edge antimalware. Trusted by more than 5.5 million customers worldwide every day, it supports Windows, Macs, iOS, and Android devices.

**Backs up everything** — operating systems, applications, settings, files, smartphone data, tablets, and Microsoft 365 accounts — so you can recover anything. Stores backups on local drives, external hard drives, NAS, and the cloud. Clones a system disk even when it is in use. Automatically replicates local backups in the cloud for guaranteed off-site copies.

**Stops all cyberattacks** — including never-before-seen threats — with real-time antimalware protection, on-demand antivirus scans, AI-powered antiransomware, and cryptomining blocker. Web filtering prevents users from accessing sites that spread malware, host phishing attacks, or promote fake news. Stops malware injection and hacker attacks when using videoconferencing apps like Zoom, Webex, and Microsoft Teams.

**Reduces the complexity and cost of safeguarding data** so you never have to worry about disruptions to your digital life again. More than backup. More than antivirus. It offers complete cyber protection.

NEW FEATURES	KEY FEATURES	SUPPORTED OPERATING SYSTEMS
<ul style="list-style-type: none"> <li>• Real-time antimalware protection that checks every file the user interacts with (subscription required)</li> <li>• Antivirus scans (full system and quick) can be scheduled or run on-demand (subscription required)</li> <li>• Web filtering stops access to sites that spread malware, host phishing attacks, etc. (subscription required)</li> <li>• Videoconferencing protections stop hackers from exploiting popular apps</li> <li>• Quick backup validation to gauge the effectiveness of the last backup faster</li> <li>• Resumable replication restarts interrupted operations without duplicating data</li> </ul>	<ul style="list-style-type: none"> <li>• Proven the fastest full image and file-level backups</li> <li>• Disk cloning even while the Windows or Mac system is in use</li> <li>• Two-click backup and restore</li> <li>• Restores to the same or dissimilar hardware</li> <li>• Integrated AI-based defense against ransomware and cryptojacking</li> <li>• Wireless mobile backup (Android or iOS) to local PC, Mac or NAS device</li> <li>• Data migration between iOS and Android</li> <li>• Touch-friendly user interface with displays of backup activities, stats, and protection status</li> <li>• Wi-Fi selection to avoid metered connections and unsafe public networks (subscription required)</li> <li>• Automatic replication of local backups in the cloud (subscription required)</li> <li>• Direct cloud-to-cloud backups of Microsoft 365 data (subscription required)</li> <li>• Remote backup (subscription required)</li> </ul>	<p><b>Microsoft Windows</b></p> <ul style="list-style-type: none"> <li>• Windows 10 (all editions, including May 2020 Update)</li> <li>• Windows 8.1 (all editions)</li> <li>• Windows 8 (all editions)</li> <li>• Windows 7 SP1 (all editions)</li> <li>• Windows Home Server 2011</li> </ul> <p><b>Apple macOS</b></p> <ul style="list-style-type: none"> <li>• macOS Catalina 10.15</li> <li>• macOS Mojave 10.14</li> <li>• macOS High Sierra 10.13</li> <li>• macOS Sierra 10.12</li> <li>• OS X El Capitan 10.11</li> </ul> <p><b>Mobile Operating Systems</b></p> <ul style="list-style-type: none"> <li>• iOS 11.0 or later</li> <li>• Android 5.0 or later</li> </ul> <p><i>* Windows Embedded and IoT are not supported</i></p>

<p><b>ONLY ACRONIS TRUE IMAGE 2021 LETS YOU:</b></p> <ul style="list-style-type: none"> <li>• <b>Manage</b> backups and cybersecurity across all devices from an easy-to-use online dashboard with visual displays of activities and statistics</li> <li>• <b>Back up</b> your entire system in just two clicks</li> <li>• <b>Recover</b> to the same or new hardware easily and efficiently</li> <li>• <b>Stop all modern cyberattacks</b>, including those never seen before</li> <li>• <b>Replicate</b> local backups in the cloud automatically</li> <li>• <b>Protect</b> all of your Windows, Mac, iPhone, iPad, and Android devices with a single solution</li> <li>• <b>Reduce the complexity, cost, and security gaps</b> that come from using multiple solutions to safeguard your data</li> </ul>	<p>Standard license.
