

# T9 Smart Thermostat

# T9 Smart Thermostat

## - Control comfort in any room

- Smart Room Sensors help you experience the right temperature in the right rooms. When paired with the T9 Smart Thermostat, sensors let you prioritize living areas during the day and bedrooms at night for comfort where you want it, when you need it.

## - Experience savings while you're away and comfort while you're home

- Adjust your thermostat from anywhere, or let the home react to your schedule with geofencing. Smart alerts let you know if the home is too hot or too cold.

## - Get whole home coverage

- Smart Room Sensors have a range up to 200 feet and a 1-year battery life.

## - Balance rooms that are too warm or too cold

- Balance the temperature of multiple rooms, creating a more comfortable home

## - Comfort can follow your lead

- With people detection, Smart Room Sensors can know when a room becomes occupied, automatically adjusting the room's temperature when you enter

## - Setup is smarter and simpler than ever

- The thermostat can configure itself – just answer a few simple questions to get started. The included power adapter is an easy-to-install, low-voltage alternative to a C-Wire, so the thermostat is compatible with most homes

## - Works with:

# Smart Home Comfort | T9 Smart Thermostat Competitive Differentiation

## Simple Menu Selection

The T9 Smart Thermostat's simple, sharp touch display allows you to scroll menus right on the thermostat, personalizing your controls.

## Simple Installation

The T9 Smart Thermostat is easy to install yourself, especially with Honeywell Home support available. Its C-Wire solution also means it's compatible with most homes.

# Smart Home Comfort | T9 Smart Thermostat Competitive Differentiation

## Interactive High Quality Display

While competitors only show a single room's temperature on the thermostat at any time, the easily navigated menus on the T9 Smart Thermostat will show you the current temperature for each and every Smart Room Sensor and allow you to define multiple prioritized rooms and preferred comfort settings for each of them.

# Smart Home Comfort | The T9 Day

6:00 AM

Simple scheduling makes it easy to set a preferred temperature in any room at any time, and prioritize different multiple rooms at different times of day.

7:00 AM

Smart Room Sensors' people detection mean they know where you and your family are, so comfort follows you to rooms in use, not empty spaces.

2:00 PM

The Honeywell Home app and smart alerts let you check on your thermostat from anywhere, and get notified of temperatures above or below your set thresholds.

5:00 PM

Geofencing, with a custom designated radius, means the T9 Smart Thermostat will know as you come and go, so you'll always be comfortable at home and save energy when you're not.

10:00 PM

Multiple prioritized rooms with individualized settings mean any room can be as they like it, without choosing one or creating hot or cold spots elsewhere in the home.

## Balance your comfort just right.

With the range on the T9 Smart Thermostat's Smart Room Sensors, your thermostat isn't limited by its location. So now you can cover multiple areas in your open concept living space to help eliminate existing hot or cold spots, balancing comfort overall.

## Let your thermostat follow your lead.

The T9 Smart Thermostat and Smart Room Sensors know when a room is occupied by people (not pets or inanimate objects) – so comfort follows you as bath time moves to bed time, ensuring you're always comfortable.

### **Sleep and live smarter with Smart Room Sensors.**

Extend your thermostat's reach beyond the hallway. Smart Room Sensors with whole-home coverage mean your thermostat knows the temperature in any room – like a nursery, to help make the room more comfortable for a great night's sleep.

**Save money, and earn some extra.**

Honeywell Home has teamed up with utility companies to help reward you for saving energy. You can get paid just for signing up, and earn rewards from your utility each season for your energy efficiency. Savings made simple.

## Know you're ecofriendly, anywhere you are.

With the Honeywell Home app, you can monitor your thermostat and usage from anywhere. Smart alerts will let you know if the temperature gets too extreme, so you don't have to worry about an unexpected freeze or temperature change in your home.

“Your bedroom is 72 degrees”

### Live Smarter, Rest Better

Smart sensing with temperature, humidity, and occupancy optimizes true comfort room by room depending on who's there, and reduces consumption by not driving runtime unnecessarily.

“Expected spend this month is \$197”

### Energy and Runtime Reporting

Get monthly runtime reports and spend reporting to help get control over what the home is consuming. You can always check in real-time, anytime you like, anywhere you are.
