

# Platin Monaco 5.1+WiSA SoundSend Product Spec Sheet

## **Title:**

Platin Monaco 5.1 with WiSA SoundSend Wireless Transmitter | Home Theater System for Smart TVs | Feature 5.1 Channels of Uncompressed 24-bit 48 kHz Sound | WiSA Certified & Tuned by THX | Dolby Atmos

## **Product Messaging:**

- STUNNING SURROUND SOUND | Monaco speakers are individually and collectively Tuned by THX, the uncontested leader in cinematic surround sound. The SoundSend audio transmitter decodes cinematic audio formats, such as Dolby Atmos.
- WiSA CERTIFIED | Monaco components are WiSA Certified—they meet the highest globally-recognized standards for wireless speaker systems, ensuring superior performance, reliability, and interoperability.
- SUPERIOR QUALITY | Featuring 5.1 channels of uncompressed 24-bit 48 kHz sound, Monaco delivers rich, robust audio with crystal-clear dialog that's superior to Bluetooth, MP3, and CD formats. Want to expand your system? No problem. Monaco supports up to eight channels of cinema-quality sound—simply add WiSA-certified speakers.
- SIMPLE TO SET UP | Plug the speakers and SoundSend into power outlets and connect SoundSend to your Smart TV. That's it. SoundSend does the rest. It connects to your Monaco speakers automatically, creating a robust wireless network for your sound system.
- SIMPLE TO OPERATE | Adjust volume with your TV remote or with the SoundSend app (iOS and Android). Want to fine tune your system? The app makes it simple. For example, easily calibrate your sound around a designated sweet spot in the room, using the exclusive MyZone feature.

## **Product Summary:**

The Platin Monaco 5.1 Plus SoundSend Immersive Wireless Home Audio System lets you add high resolution Dolby Atmos 5.1.2 channel audio to any room or environment. Simply plug the included speakers into power outlets and connect the included WiSA SoundSend into any TV with ARC or eARC. Within minutes you're ready to immerse yourself surrounded in audio from your favorite movies, TV shows, sports, music, and games. Plus, with the free SoundSend mobile app for iOS and Android you get complete control to fine tune and adjust your audio system. The app's advanced features allows you to play with volume trim on each independent speaker, adjust EQ settings, and more.

A Better, Faster Approach. No need to run audio cables across the room and figure out how to hide them. No connecting cables to your TV. No configuring your Wi-Fi network. And best of all, no need to compromise on sound quality for convenience.

Just place the speakers anywhere near an AC outlet, attach the SoundSend transmitter to your TV with ARC or eARC and enjoy amazing, immersive multi-channel audio in minutes. It takes more time to take everything out of the box than it does to complete the quick and easy setup.

WiSA Gives You Wireless Home Theater Audio Without Compromise. With the SoundSend transmitter included with speakers you can enjoy Dolby Atmos 5.1.2 audio content at much higher quality than Bluetooth, MP3s and even CDs Wireless multi-channel home audio solutions used to require tradeoffs in audio quality and were susceptible to latency issues that adversely affected the experience. The WiSA Association and its members have solved this problem. The audio signal is delivered at full resolution, without the signal or bandwidth compression that used to be necessary. And, with 5.2 millisecond latency and speaker synchronization of less than one microsecond, you get superior audio synchronization without distracting "lip sync" mismatches.

Virtually all recent films, TV shows, concerts, and sporting events are 5.1 audio through major cable companies, Netflix, Hulu, and most other streaming services. With WiSA SoundSend transmitter included you can enjoy audio the way it's meant to sound and Dolby Atmos 5.1.2 is an option.

Enjoy full control of your speaker system. The free SoundSend mobile app for iOS and Android allows complete control to fine-tune and adjust your audio. The app's advanced features include 5-band EQ and allow you to adjust volume on each speaker.
