## AUDIOCONTROL ALTITUDE AMPLIFIER SERIES

Elevate your audio experience with AudioControl's Altitude Amplifier Series, designed from the ground up to be sleek and modern with a minimalist aesthetic and superior heat dissipation. Performing at the top of their class, these amplifiers offer robust power and exceptional quality.

Altitude amplifiers feature Valet Mode, which safeguards your system from unintended damage by limiting the maximum volume to 25% when activated. They are also compatible with start-stop systems and electric vehicles, ensuring outstanding performance in any vehicle.

Pair Altitude amplifiers with AudioControl's PNW speakers and Space or Spike subwoofers. This combination creates a soundscape engineered to deliver the pure, uninterrupted power that AudioControl is known for.

- High/Low Input Modes
- GTO™ Signal Sense
- Linkwitz-Riley Crossovers
- Start-Stop Compliant
- High Power Output in a Sleek Chassis
- ParaBASS® Low Frequency Contouring
- Valet Mode Option
- Optional Remote Level Control (ACR-1)
- EV Compliant up to 17V
- Spike Mode (Select Models)

MODEL	Channels	Inputs	Continuous Power (RMS) at 14.4V	Maximum Input Voltage	S/N Ratio (ref: rated power)	Valet Mode	THD+N	Subsonic Filter	Linkwitz-Riley X-Over		Bass Processing	Remote Level Control

### SPIKE MODE!

allows you to connect three 4Ω subwoofers at 1.33Ω, unleashing even more power from your Altitude Series amplifier, designed to run cool at maximum output for extended periods of time. With the ParaBASS control knobs you can fine-tune your bass for the ultimate audio experience. Customize your sound and feel the difference. Your bass, your way.
