JENN-AIR®

PRODUCT GALLERY

JENN-AIR®

A LEGACY OF LUXURY

Jenn-Air brand is synonymous with high-end kitchen appliances that offer sophisticated design, innovative technology and exceptional performance.

First recognized for creating the legendary downdraft cooktop and bringing convection cooking into the home, Jenn-Air brand makes exceptional appliances for the entire kitchen – from powerful, professional-style ranges to stylish, built-in refrigerators.

Jenn-Air brand showcases uncompromising innovation with a mobile app that brings WiFi connectivity to select wall ovens and freestanding refrigerators.

A refreshed line of cooktops includes new electric, gas and induction downdraft cooktops, and 15-inch cooktop modules that promote new options for open concept kitchens. Our exclusive Obsidian interior finish, which is available on all built-in refrigerators, has now been extended to our connected freestanding refrigerators.

Our appliances offer unprecedented performance while cooking and entertaining. Because details matter, Jenn-Air brand will never settle for the ordinary when the extraordinary can be achieved.

DIRECTORY

EURO-STYLE STAINLESS STEEL

Appliances in the Jenn-Air® Euro-Style Stainless kitchen suite combine modern aesthetics and classic flair. Crafted with simple, graceful lines, this extensive collection captures the sophistication of stainless steel.

The elegant, uninterrupted design is just one part of the story. Homeowners will enjoy exceptional performance that stirs the senses – and their creativity.

Design highlights of the Euro-Style suite include slightly curved, stainless steel handles and subtle, embossed lettering.

PRO-STYLE® STAINLESS STEEL

Jenn-Air® Pro-Style® Stainless appliances combine robust design with features that deliver exceptional results. The striking, stainless steel finish lends itself to a variety of kitchen designs – from urban lofts to country estates.

Signature features of this line include diamond-etched stainless steel handles and oversized knobs. The distinctive badge and heavy-duty grates are bold details that help our kitchen appliances express commercial styling at its finest.

FLOATING GLASS

Jenn-Air® appliances featured in the Floating Glass series bring pristine surfaces and elegant electronic controls together for a flawless look that will satisfy the most discriminating tastes.

The signature elements include high-gloss glass panels, which accent surrounding cabinetry and provide a clean, contemporary alternative to stainless steel. Other design highlights include a subtle badge with embossed metallic lettering and slightly curved, color-coordinated handles.

BUILT-IN COFFEE SYSTEM
THE PERFECT BREW

The Jenn-Air™ built-in coffee system gives consumers an option for enriching their lifestyle or to enhance entertaining. At just 24 inches wide, the coffee system easily fits most kitchens as well as other areas such as a den, home office or dining room. And because it plugs into a standard 120-volt outlet and doesn't need to be attached to a water line, it's easy to install.

The built-in coffee maker creates the **precise temperature and pressure conditions** that are required to brew espresso as well as espresso-based cappuccinos and lattes. Two of the signature features that let you know you are getting a properly brewed espresso will be the way the espresso **dispenses in tails** and the layer of crema that appears on top of the finished espresso.

To switch from espresso to a cappuccino or latte, simply replace the hot water spout with the **integrated milk container**. And the versatility of the coffee system is displayed by its ability to dispense hot water for beverages such as tea.

The **professional-grade whole-bean grinder** is designed to handle the regular task of grinding coffee beans and features 13 integrated levels, calibrated for fine to coarse. Easy access to the internal components makes the entire system easy to clean.

Overall Product Dimensions
23³/₈" w x 18" h x 15¹⁵/₁₆" d

24" Built-In Coffee System

JBC7624B – 24"

Style Option:

S Euro-Style Stainless

- Ideal 11.7 BARs of consistent brewing pressure
- Integrated 13-level whole-bean coffee grinder
- Dual dispensing spouts for one- or two-cup brewing
- Ease of use and cleaning
- Customizable size, strength and temperature settings

WALL OVENS
ROBUST POWER,
BEAUTIFUL FORM

Jenn-Air® wall ovens are touchstones of innovation, performance and timeless style that will become one of the crown jewels of your kitchen. Our heritage of thoughtful design continues in the incomparable performance and attention to detail found in flush-to-cabinet Jenn-Air® wall ovens, available in 30- and 27-inch widths and single, double or combination configurations.

Our wall ovens deliver subtle sophistication to kitchens. Their flush-to-cabinet design complements other Jenn-Air® appliances as part of an entertainment suite. Versatile single wall oven configurations can install below a countertop, or in a wall below a built-in microwave oven.

Only Jenn-Air® wall ovens allow the creation of incredible meals tailored to individual expectations with the **Jenn-Air® Culinary Center**, utilizing full-color imagery to guide cooks to an effortless, sumptuous result. And, users will enjoy how the **V2™ vertical dual-fan convection system** provides even heat distribution throughout the oven for superior results on every rack.

As an added benefit, wall ovens with our V2™ vertical dual-fan convection system offer **WiFi connectivity** that integrates the oven with existing devices in meaningful ways such as **Works with Nest** and **Amazon Alexa**. And our mobile app puts control of the wall oven, including the Culinary Center, at your fingertips.

Control that is Always at Hand

Connecting to your wireless local area network, select wall ovens offer unprecedented connectivity through a fully functional app for iOS and Android devices. Easily check the status of oven cycles, receive notifications when preheat and cooking cycles are complete, control oven settings and use the next-generation Jenn-Air® Culinary Center, all with just a simple touch of your mobile device.*

* App features and functionality subject to change. Subject to terms of use and privacy policy at jennair.com/connect. Data rates may apply. The iPhone is a trademark of Apple Inc.

My Creations

Featured on Jenn-Air® wall ovens, My Creations allows you to seamlessly combine up to three cooking modes and save the settings for your favorite recipes.
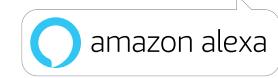

* Works With Nest.

Complement Your Wall Oven with a Warming Drawer

Adding a warming drawer to your kitchen will help you create a comprehensive cooking center. Keep completed dishes warm and at the ideal texture until you're ready to serve, or use its specialized slow roasting and bread proofing functions for even more flexibility. Match your warming drawer to any of our signature kitchen suite designs with a coordinating panel kit. See pages 98-101 for more details.

Seamless Elegance and Minimalist Style with Flush Installation

Leaving only a 1/8" gap on all edges, our wall ovens can be installed flush with walls or cabinetry, offering you a seamless, integrated design that is perfectly at home in both contemporary and traditional kitchens, as well as every kitchen design in-between.

* Works With Nest.

Performance Highlighted by DuraFinish® Protection

Recognizable the instant the oven door is opened, the stainless steel convection tower is coated with DuraFinish® Protection. This specialized finish brilliantly highlights the exceptional performance of our wall ovens with the V2™ vertical dual-fan convection system, helping protect the convection tower from staining, scratching and discoloration from high-temperature cooking. Spills or baked-on foods wipe off easily with a damp cloth, making cleaning virtually effortless.

STEAM AND CONVECTION WALL OVEN
EXTRAORDINARY RESULTS

The 24-inch, Jenn-Air® Steam and Convection wall oven is a stylish choice that fits the desire to have appliances that elevate the entire kitchen experience. 27- and 30-inch trim kits ship with the oven, making it easy to pair with a wall oven and the flush-to-cabinet design allows an integrated look with surrounding cabinets and appliances.

Steam, convection heat, or a combination of the two let you cook almost every type of food imaginable. To make this oven even easier to use, the **oven ships with a temperature probe and three racks** that are ideal for specific cooking tasks.

As more attention is paid to where our food comes from, this oven focuses on the way food is prepared. **Steam cooking** enhances the nutrient retention in foods like vegetables and seafood, preserves the tenderness of meats and poultry and takes the place of the work-arounds needed when baking restaurant-style breads and pastries. A **1,200-watt convection element** can either be used independently or with the steam capability to help ensure even, golden-brown results without the flavors of one food transferring to another.

With nine cooking modes there are dozens of ways to create a meal of distinction. A **Preset Foods mode offers 68 different pre-programmed cycles** that eliminate guesswork by automatically adjusting the oven's cooking settings based on the selection.

A Versatile Companion to a Full-Size Oven

A Proofing function adds versatility to the steam and convection oven. When this function is selected, the oven temperature will operate at 105°F, allowing dough to rise significantly faster compared to proofing at room temperature. Proofing time can be set for up to 90 minutes.

Water Reservoir

With this removable reservoir, supplying your oven's steam generator with water couldn't be easier. Rather than plumbing the oven, simply fill the reservoir with tap water, place it back into its compartment, and close the oven door.

Getting Started with Steam

Cooking with steam is a technology that will be new to most consumers. Our iBook, ENTERTAIN: Cooking with Steam and Convection! is an ideal resource for discovering the potential of this amazing appliance. You can download a free copy at the iBookstore.

PRO-STYLE® RANGETOPS
THE PEAK OF PERFORMANCE

Jenn-Air® Pro-Style® rangetops are designed to meet the needs of those who want restaurant-style performance and aesthetics in their appliances. Four- or six-burner rangetops are available in 48-, 36- and 30-inch widths. Each range top is convertible to LP gas, with the included kit, allowing homeowners to use the fuel type that suits their needs.

The layout of a Pro-Style® rangetop is designed to allow the freedom to cook with both the proper power level and burner size for superior results. Among the rangetop's four or six burners are one or two **20,000 BTU dual-stacked PowerBurners**, which feature the versatility of two burners in one location with both high- and low-heat capabilities.

When paired with a **5,000 BTU simmer burner**, cooks have dedicated access to precise lows for delicate tasks like melting chocolate or simmering fragrant soups. For even more versatility, choose a configuration with a **high-performance chrome electric griddle**, which is ideal for quickly searing steak or seafood while radiating less heat into the kitchen. The chrome-infused surface doesn't require seasoning and retains its attractive, smooth surface even after heavy use.

The footprint of a Jenn-Air® Pro-Style® rangetop expands design options, allowing installation in an island. The rangetop's robust stainless steel construction provides an elegant, gourmet aesthetic to any kitchen. And, **cast iron grates** form a continuous surface above the sealed burners, making sliding pans across the surface effortless. Complement a Pro-Style® rangetop with other Pro-Style® appliances, like a wall oven, to create a commercial-style kitchen suite.

48" Pro-Style® Rangetop with Griddle

JGCP548WP – 48"

- Two 20,000 BTU dual-stacked PowerBurners
- Electric griddle (1,320 watts)

DOWNDRAFT COOKTOPS
EXQUISITE INNOVATION

The Jenn-Air brand's legacy of innovation began with introducing downdraft ventilation to the world of kitchen design, enabling open concept kitchens and making the kitchen an integral part of the home. 36- and 30-inch induction, gas or electric downdraft cooktops eliminate the need for overhead ventilation, making them ideal for design-conscious homeowners who desire expanded kitchen layout possibilities.

Because downdraft ventilation occurs at the cooking source, vapors are captured before they can escape. This means that fewer CFM are required to capture those vapors, resulting in a quiet ventilation system and a quiet kitchen.

Whether the system is our **JX3™ downdraft ventilation system** or the **perimetric extraction** version available on electric models, our exclusive **duct-free installation** option makes a downdraft cooktop suitable for any kitchen, including those where traditional ductwork is impractical.

In addition, all Jenn-Air® downdraft cooktops feature elements or burners that are among the most powerful in their class. Gas cooktops include an **ultra-high output burner** that produces the robust heat necessary for searing steak or stir-frying. Fast and **flexible induction elements** utilize the entire cooking surface to allow the use of multiple, differently sized cookware at the same time. And the electric models' **Triple-Choice™ and Dual-Choice™ elements** offer versatility in the form of multiple, different sized elements in the same location.

36" JX3™ Gas Downdraft Cooktop

◢ COOKTOPS
PRECISE POWER

A Jenn-Air® cooktop, whether fueled by gas, electric or induction, features a low-profile design that sits nearly flush with the countertop, providing an integrated transition between cooktop and countertop. This minimal design has maximum impact, with clean lines and a seamless look that complements any kitchen décor.

Each Jenn-Air® cooktop features elements or burners that are among the most powerful in their class. Select gas cooktops feature our versatile **dual-stacked PowerBurner**. This two-in-one burner delivers both the high power needed for rapid boiling or searing and the gentle flame needed for delicate tasks like melting cheeses or chocolates.

Our gas cooktops also include a dedicated high-precision simmer burner that allows the simultaneous preparation of high heat and low heat dishes.

For those who desire the low-profile design of ceramic glass, Jenn-Air® electric cooktops feature responsive **Dual-Choice™ and Triple-Choice™ elements**, which provide the flexibility of two or three different-sized elements in the same location, allowing for use of both large and small pans.

With a cooking surface similar to an electric radiant cooktop, our induction cooktop's **Performance Boost function** allows the use of higher-than-maximum heat for up to ten minutes to sear or stir-fry. To accommodate large or long pans, like griddles, an **induction bridge element** expands the cooking surface by combining two smaller elements.

36" Glass 5-Burner Gas Cooktop

JGC2536E – 36"

Find Your Perfect Ventilation Match

Jenn-Air® ventilation systems remove steam, smoke and odors generated by cooking processes to help ensure a fresh, clean kitchen before dinner is served. See pages 119-123 to find a system that fits your cooking surface.

Low Profile Design

Nearly flush with the countertop, Jenn-Air® stainless steel gas cooktops provide an integrated transition from countertop to the cooktop with an exceedingly low profile of nearly 3 mm. The minimal look has the maximum impact with robust, continuous grates, slightly elevated for optimal cooking efficiency and pan stability. The clean lines of this seamless look complement any kitchen décor.
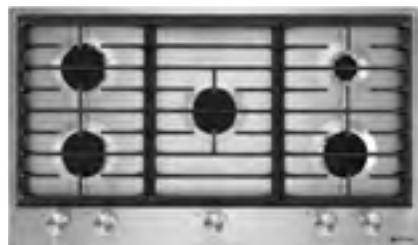

36" Gas Cooktop

JGC3536G – 36"

- Single point electronic ignition and Flame-Sensing™ re-ignition
- 5 sealed brass burners with removable base
- Low-profile design with true flush installation option
- White LED backlit knobs

Overall Product Dimensions
30" w x 21" d

15" 2-Burner Modular Gas Cooktop

JGC3215G – 15"

Style Option:

S Euro-Style Stainless

- 15,000 BTU dual-stacked PowerBurner
- Single point electronic ignition and Flame-Sensing™ re-ignition
- 2 sealed brass burners with removable base
- Low-profile design with true flush installation option
- White LED backlit knobs

Overall Product Dimensions
15" w x 21" d

15" Single-Burner Modular Gas Cooktop with Wok Ring

JGC3115G – 15"

Style Option:

S Euro-Style Stainless

- 20,000 BTU commercial-style dual ring burner
- Single point electronic ignition and Flame-Sensing™ re-ignition
- Brass burner with removable base
- Low-profile design with true flush installation option
- White LED backlit knob

Overall Product Dimensions
15" w x 21" d

15" Modular Electric Griddle

JEF3115G – 15"

Style Option:

S Euro-Style Stainless

- 1,800-watt electric griddle
- Low-profile design with true flush installation option
- White LED backlit knob

Overall Product Dimensions
15" w x 21" d

15" Modular Induction Cooktop

JIC4715G – 15"

Style Option:

S Euro-Style Stainless

- 2 flexible induction elements
- Low-profile design with true flush installation option
- Glass-touch electronic controls
- Available Q4 2017

Overall Product Dimensions
15" w x 21" d

15" Modular Induction Wok

JIE4115G – 15"

Style Option:

S Euro-Style Stainless

- Concave glass bowl design accepts 14-inch round-bottom induction wok (purchased separately)
- Low-profile design with true flush installation option
- Glass-touch electronic controls
- Available Q4 2017

Overall Product Dimensions
15" w x 21" d

4" Modular Downdraft Vent

JVD0303G – 4"

Style Option:

S Euro-Style Stainless

- 350 CFM blower capacity
- Convertible to duct-free ventilation with duct-free filter kit (purchase separately)
- Low-profile design with true flush installation option
- Available Q4 2017

Overall Product Dimensions
4" w x 21" d

36" Induction Cooktop

JIC4536X – 36"

Style Options:

S Euro-Style Stainless   B Black Floating Glass

- Induction technology
- 12"/9" – 5,000-watt Dual Zone element
- Sensor Boil function
- Performance Boost function
- Four 7" – 2,500-watt elements with Bridge function

Overall Product Dimensions
36⁵/₁₆" w x 21⁵/₁₆" d

Induction Technology

Jenn-Air® induction. Cooks like gas, looks like electric, outperforms both. Heat created directly in the cookware makes it the heat source which, in turn, cooks the food. And, with the touch of a button, the Sensor Boil feature will bring even large stockpots quickly to a boil.

30" Induction Cooktop

JIC4430X – 30"

Style Options:

S Euro-Style Stainless   B Black Floating Glass

- Induction technology
- 11" – 3,700-watt element
- Sensor Boil function
- Performance Boost function
- Two 7" – 2,500-watt elements with Bridge function

Overall Product Dimensions
30⁵/₁₆" w x 21⁵/₁₆" d

36" Electric Radiant Cooktop with Glass-Touch Electronic Controls

JEC4536B – 36"

Style Options:

S Euro-Style Stainless   B Black Floating Glass

- Glass-touch electronic controls
- 12"/9"/6" Triple-Choice™ element
- 10"/6" Dual-Choice™ element
- Precise Power® function available on all elements
- Simmer, Melt and Keep Warm™ functions available on all elements

✦ PRO-STYLE® RANGES
A BOLD CENTERPIECE

A Jenn-Air® Pro-Style® range is the centerpiece of a bold, commercially-styled kitchen, lending it timeless class and impressive performance. These ranges are available in 48-, 36- or 30-inch widths and an array of cooking surface configurations in both natural gas and LP gas, allowing homeowners to select the model that best fits their cooking style.

A Pro-Style® range's cooktop layout is designed to allow maximum freedom when cooking, while using the proper power level and burner size for superior results. Pro-Style® range cooktops have **four or six versatile burners**, including a **dual-stacked PowerBurner** which provides the flexibility of two burners in one location with both high and low heat capabilities. In addition, a dedicated **simmer burner** can achieve gentle lows that are ideal for simmering sauces and fragrant soups as well as melting delicate chocolate.

These burners can be matched with a **high-performance chrome electric griddle** that is ideal for quickly searing fish, shrimp or steak while radiating less heat into the kitchen.

All Pro-Style® ranges feature a large-capacity oven with the **Dual-Fan MultiMode® True Convection System**, which distributes heat throughout the oven for even coverage on every rack. For those who use their oven frequently, the 48-inch model's double-oven allows cooks to simultaneously prepare dishes that require different temperatures.

48" Pro-Style® Dual-Fuel Range with Griddle and Dual-Fan MultiMode® True Convection System

JDRP548WP – 48"

- Dual-fan MultiMode® true convection system (main oven)
- Two 20,000 BTU dual-stacked PowerBurners
- Electric griddle (1,320 watts)
- Three 15,000 BTU burners
- 5,000 BTU simmer burner (reduces to ultra-low 700 BTUs)
- 7-inch full color touch-anywhere LCD display
- Auto Convection Conversion

Overall Product Dimensions
47⁷/₈" w x 36³/₄" h x 29¹/₄" d

36" Pro-Style® Dual-Fuel Range with Dual-Fan MultiMode® True Convection System

JDRP436WP – 36"

- Dual-fan MultiMode® true convection system
- Two 20,000 BTU dual-stacked PowerBurners
- Three 15,000 BTU burners
- 5,000 BTU simmer burner (reduces to ultra-low 700 BTUs)
- 7-inch full color touch-anywhere LCD display
- Auto Convection Conversion

Overall Product Dimensions
35⁷/₈" w x 36³/₄" h x 29¹/₄" d

36" Pro-Style® Dual-Fuel Range with Griddle and Dual-Fan MultiMode® True Convection System

JDRP536WP – 36"

- Dual-fan MultiMode® true convection system
- 20,000 BTU dual-stacked PowerBurner
- Electric griddle (1,320 watts)
- Two 15,000 BTU burners
- 5,000 BTU simmer burner (reduces to ultra-low 700 BTUs)
- 7-inch full color touch-anywhere LCD display
- Auto Convection Conversion

Overall Product Dimensions
35⁷/₈" w x 36³/₄" h x 29¹/₄" d

30" Pro-Style® Dual-Fuel Range with Dual-Fan MultiMode® True Convection System

JDRP430WP – 30"

- Dual-fan MultiMode® true convection system
- 20,000 BTU dual-stacked PowerBurner
- Two 15,000 BTU burners
- 5,000 BTU simmer burner (reduces to ultra-low 700 BTUs)
- 7-inch full color touch-anywhere LCD display
- Auto Convection Conversion

Overall Product Dimensions
29⁷/₈" w x 36³/₄" h x 29¹/₄" d

Industry's First Full Color LCD Display on a Range

Get the most out of all the oven's functions. The 7-inch full color LCD display's advanced technology allows you to touch anywhere on the display to control virtually all oven settings. Four key menus are precisely organized on each screen for unrivaled usability. Slider technology allows precision temperature adjustment with a swipe of the finger.

Dual-Stacked PowerBurners

Each PowerBurner features two burners stacked in one location on the cooking surface with a maximum output of 20,000 BTUs (natural gas models) or 15,500 BTUs (LP models) providing the power for high-temperature cooking techniques such as wok cooking and flash frying.

48" Pro-Style® Gas Range with Griddle and Dual-Fan MultiMode® True Convection System

JGRP548WP – 48"

- Dual-fan MultiMode® true convection system (main oven)
- Two 20,000 BTU dual-stacked PowerBurners

DOWNDRAFT RANGES
A LEGACY OF FRESH AIR

Jenn-Air® downdraft ranges embrace the legacy of innovation that began with introducing downdraft ventilation to the world of kitchen design, defining and enabling the open-concept kitchen. 30-inch Jenn-Air® downdraft ranges are available in electric radiant or dual-fuel configurations with large-capacity true convection ovens that are perfect for entertaining.

Downdraft ventilation is ideal for design-conscious cooks who appreciate clean lines, unobstructed views and quiet kitchens, because it eliminates the need for overhead venting and expands possible kitchen layouts. And, because downdraft ventilation occurs right at the cooking source, capturing cooking vapors before they can escape, fewer CFM are required, meaning a quieter ventilation system – and a quieter kitchen.

Cooks can enjoy the benefits of downdraft ventilation in any kitchen, including those where traditional ductwork and ventilation is impractical, with an **innovative duct-free installation option**.

Each downdraft range is designed to be **full-depth**, fitting into a standard range opening as a replacement option for a freestanding range, even in an island or peninsula configuration. These ranges install without a back bridge countertop piece to provide an attractive, custom look.

Beyond striking design, downdraft ranges feature a large capacity **true convection oven**, which evenly distributes heat over multiple racks to produce superior results, like golden, flaky pastries.

No matter which fuel configuration is chosen, a Jenn-Air® downdraft range provides the desired performance and precision with versatile burners and elements that range from searing highs to simmering lows.

30" Dual-Fuel Downdraft Range

JDS1750F – 30"

Style Options:

P Pro-Style® Stainless   **S** Euro-Style Stainless   **B** Black Floating Glass

- Downdraft ventilation system with 2 speeds
- Convertible to duct-free ventilation
- Brass burners
- DuraFinish® Protection
- 17,000 BTU burner
- True Convection
- Telescoping glide rack
- Soft, auto-close oven door

Overall Product Dimensions
$29^7/_8$" w x 36" h x $28^5/_{16}$" d

30" Electric Radiant Downdraft Range

JES1750F – 30"

Style Options:

S Euro-Style Stainless   **B** Black Floating Glass

- Downdraft ventilation system with 2 speeds
- Convertible to duct-free ventilation
- Dual zone element
- True Convection
- Telescoping glide rack
- Soft, auto-close oven door

Overall Product Dimensions
$29^7/_8$" w x 36" h x $28^5/_{16}$" d

Convertible to Duct-Free Ventilation

The duct-free filter kit efficiently captures smoke, grease and moisture, resulting in a consistently fresh kitchen with an open, inviting design. See page 82 for more details.

DuraFinish® Protection

Jenn-Air® dual-fuel and gas full-depth ranges feature DuraFinish® Protection. This scratch- and stain-resistant protection keeps the cooktop looking like new by also resisting yellowing that high-heat cooking can cause over time.

Duct-Free Filter Kit

W10748976   **W10768191**

Style Option: **Style Option:**

S Stainless Steel   **B** Black Floating Glass

- For use with full-depth ranges JDS1750F and JES1750F
- Captures smoke, grease and moisture, and allows air to travel through the filter without a loss of air efficiency
- Includes a replacment indicator

Trim Kit

W10675028   **W10675026**

RANGES
AN EXCEPTIONAL CHOICE

Offering a wide range of options, Jenn-Air® ranges support consumers' creativity and consistently provide exceptional results. At 30-inches wide, these full-depth ranges fit a standard range opening and are available in induction, electric, gas or dual-fuel configurations with a powerful true convection oven.

The **full-depth design** of Jenn-Air® ranges allows owners to achieve a built-in look without replacing existing cabinetry. These ranges are designed to fit into a standard range opening, which makes them easy to install without a back bridge countertop piece and provides a custom, polished look.

In addition to excellence in design, consumers will enjoy a **true convection oven** with a dedicated convection element, which works in combination with a fan to provide even heat distribution throughout the oven. An Auto Convection Conversion feature takes the guesswork out of adjusting the conventional cooking times and temperatures of your recipes.

As a bonus, all Jenn-Air® ranges feature a **baking drawer** that increases the total capacity of the range and allows cooks to prepare a variety of dishes at once. Consumers can also use it as a warming drawer for plates or to keep completed dishes at their proper serving temperature.

Whichever fuel-type is chosen, these ranges provide burners or elements with impressive power and precision to suit any preferred cooking style.

NOTE: Many of the Jenn-Air® appliances shown are photographed in custom cabinetry to showcase a flush installation.

30" Dual-Fuel Range

All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.

MICROWAVE OVENS
VERSATILITY AND PERFORMANCE

Jenn-Air® built-in microwave ovens complement a suite of built-in appliances and are available in widths and configurations to suit any desired layout. These include traditional built-in and sleek drawer designs, both of which can be installed in the wall or in an island as an under-counter solution. Where more traditional styles are desired, countertop and over-the-range models are available.

As an under-counter solution, a **seamless flat-front drawer design** conserves valuable counter space and is ideal for open-concept kitchen designs, where a clean look is desirable. This microwave oven smoothly opens at the touch of a button.

Select built-in models feature a **Speed-Cook mode**, which cooks up to three times faster than traditional methods and includes 57 pre-set food settings for casseroles, fish, poultry, roasts and more. And, all Jenn-Air® built-in and drawer models include a **Keep Warm™ option** that keeps finished menu items warm until they're ready to be served.

All Jenn-Air® built-in microwave ovens, with or without a handle to match other Jenn-Air® style suites, can install flush with surrounding cabinetry.

For homeowners who prefer a countertop or over-the-range model, our countertop models can be installed into the wall with a trim kit for a more integrated appearance. And, over-the-range models feature a **perimetric extraction** ventilation system, which provides exceptional performance without sacrificing quiet operation.

Overall Product Dimensions

WARMING DRAWERS
UNMATCHED VERSATILITY

Jenn-Air® warming drawers deliver incredible flexibility in the kitchen or any room of the home – even outdoors. Available in 30- and 27-inch widths and in Pro-Style® Stainless, Euro-Style Stainless or Custom Overlay designs, each warming drawer is designed to complement other Jenn-Air® cooking products. While most warming drawers are installed below a wall oven, they may be installed virtually anywhere in the kitchen, including under a cooktop or as a stand-alone in an island.

Proper temperature and humidity control are vital aspects of keeping prepared entrées and sides ready to serve while coordinating other aspects of a meal. A Jenn-Air® warming drawer's **two humidity settings** allow precise control of the drawer's environment. Set the drawer to "Moist" to keep roasts tender, or turn it to "Dry" to keep pie crusts flaky and crispy.

In addition to flexible humidity settings, a Jenn-Air® warming drawer is a versatile appliance that goes beyond warming tableware and food. A **Slow Roast function** allows use of the drawer as an auxiliary oven to slow cook beef, pork and poultry over a long period of time, producing moist and tender results. And, those who

enjoy baking bread will appreciate the warming drawer's temperature-controlled environment for **proofing bread**, where it can rise at a low, optimal temperature.

Combine Your Warming Drawer with a Wall Oven

A warming drawer is the perfect complement to a Jenn-Air® wall oven. Keep completed dishes at the ideal temperature and texture until you're ready to serve. Specialized Bread Proofing and Slow Roast functions add flexibility. See pages 26-30 for wall oven options.

IMPORTANT: Dimensional specifications are provided for planning purposes only. **Do not make any cutouts based on this information.** Refer to installation instructions packaged with product *before* selecting cabinetry, making cutouts or beginning installation. All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.

VENTILATION
CLEAR THE AIR.

Jenn-Air brand has long been known as an industry expert in the science of air movement, beginning with introducing downdraft ventilation to kitchen design and enabling the open-concept kitchen. Our ventilation systems target smoke, steam, heat and odors generated while cooking and draw them out of the kitchen quickly and quietly. Choose from downdraft or updraft models in widths and styles to match powerful cooktops and ranges.

All Jenn-Air® ventilation solutions complement the performance and aesthetic of our cooktops and ranges. Our **Pro-Style™ hoods** feature a commercial look with heavy-duty, stainless steel styling. Low-profile island- and wall-mount hoods are modern and understated. **Pyramid-style** island- and wall-mount hoods enhance a traditional design with elegantly sloping angles, smooth facets and brushed stainless steel.

Perimetric designs, available on both low-profile and pyramid-style models, enhance performance while maintaining a quiet kitchen, making them ideal for even the most powerful ranges and cooktops.

In kitchens where overhead ventilation is impractical or undesirable, our signature downdraft ventilation systems offer duct-free installation to accommodate any kitchen layout, including those with cooktops situated in an island or peninsula. These systems, including the **Accolade® downdraft ventilation system**, rise from the countertop at the push of a button and retract back to create open sight lines throughout the kitchen.

36" Accolade® Downdraft Ventilation System

JXD7836BS – 36"

- 1,200 CFM high-performance in-line blower required (sold separately)

Perimetric Extraction

This sophisticated design is not only attractive, it is the secret behind the ventilation system's exceptional performance and quiet operation. Cooking vapors are efficiently captured by drawing air through thin slots, speeding the air and improving ventilation performance.

- Upward facing LED ambient lighting

Overall Product Dimensions
36-inch – 36" w x 24^5/$_8$-42^5/$_8$" h x 19^{11}/$_{16}$" d
30-inch – 30" w x 24^5/$_8$-42^5/$_8$" h x 19^{11}/$_{16}$" d

Sound Silencing System

Innovative technology brings a distinct level of silence to premium hoods while maintaining high performance. The Jenn-Air® sound silencing system found on select hoods optimizes air flow, increasing the amount of air taken in and decreasing the noise emitted. You'll never have to worry about disrupting pre-dinner conversation with this noise-reduction system.

LED Ambient Lighting

Upward-facing LED lighting gently illuminates the kitchen by projecting ambient light up onto the ceiling and walls, creating a soft, elegant glow. Available on JXI8536DS, JXW8536DS and JXW8530DS.

6-Level Built-In Exterior Exhaust System

This system helps maintain a pleasant living environment as the ventilation fan automatically activates when the temperature around the microwave gets too high. Additionally, these microwave ovens can be vented three ways: out the top, out the back or re-circulated utilizing a charcoal filter.

Overall Product Dimensions
29⁷/₈" w x 17⁹/₁₆" h x 16⁹/₁₆–17⁵/₁₆" d

30" Over-the-Range Microwave Oven with Convection

JMV9196C – 30"

Style Options:

S Stainless Steel   B Black

- Convection & microwave combination cooking
- Sensor cooking
- 53 menu programs
- 1,600-watt convection element
- Perimetric venting
- 6-level, built-in exterior exhaust system

Overall Product Dimensions
29⁷/₈" w x 17⁹/₁₆" h x 16⁹/₁₆–17⁵/₁₆" d

30" Over-the-Range Microwave Oven

JMV8208C – 30"

Style Options:

S Stainless Steel   B Black

- Sensor cooking
- 35 menu programs
- Perimetric extraction
- 6-level, built-in exterior exhaust system

Full-Width Chimney Cover – 12" Height

W10272081 or **EXTKIT06ES** – 48"

W10272080 or **EXTKIT04ES** – 36"

W10272079 or **EXTKIT02ES** – 30"

- Coordinates with Pro-Style™ hoods
- Covers the chimney for a seamless look
- Complements the look of commercial-style appliances

Stainless Steel Backsplash with Two Shelves

W10285449 – 48"

W10285448 – 36"

W10285447 – 30"

- Adds to commercial styling of Pro-Style™ hoods
- Protects the wall behind a cooking surface
- Shelves can be used for ingredient placement or plate staging/warming

1,200 CFM Internal Blower Motor

UXB1200DYS

- For use with custom hood liners JXL6536CSS, UXL6048YSS and UXL6036YSS
- Exhausts 1,200 CFM/Rated up to 105,000 BTUs
- 3 speed levels
- 10" round duct

600 CFM Internal Blower Motor

UXB0600DYS

- For use with custom hood liners JXL6536CSS, UXL6048YSS and UXL6036YSS
- Exhausts 600 CFM/Rated up to 65,000 BTUs
- 3 speed levels
- 10" round duct

1,200 CFM In-Line Blower Motor

UXI1200DYS

- For use with Accolade® Downdraft System JXD7836BS and custom hood liners JXL6536CSS, UXL6048YSS and UXL6036YSS

- Exhausts 1,200 CFM/Rated up to 105,000 BTUs

- 3 speed levels

- 10" round duct

Make-Up Air Kit

W10446917 – fits 10" round duct

W10446916 – fits 8" round duct

W10446915 – fits 6" round duct

W10446914 – fits 3¼" x 10" rectangular duct

- For use with all hoods greater than 400 CFM

Optional Black Top Trim

W10387677 – 36"

W10387676 – 30"

- For use with telescoping downdraft ventilation systems

- Coordinates with Black and Black Floating Glass appliances

Microwave Oven Filler Kit

8171339   **8171337**

Style Option: **Style Option:**

S Stainless Steel   B Black

- For use with over-the-range microwave ovens

- Use when installing in a 36" wide opening

- Includes two panels

Updraft or Downdraft Ventilation Systems (excluding Modular Downdraft System)

Jenn-Air® modular cooktops and companion 30- or 36-inch gas cooktops (models JGC3530G or JGC3536G) can be paired with any of our updraft or downdraft ventilation systems. The ventilation solution must be at least as wide as the cooking surface. For specific guidelines, consult the Installation Instructions for the module(s) selected.

Examples:

- A 30-inch hood can be used for up to two 15-inch modules or up to one 30-inch cooktop (model JGC3530G)

- A 36-inch hood can be used for up to two 15-inch modules or up to one 36-inch cooktop (model JGC3536G)

- A 48-inch hood can be used for up to three 15-inch modules or one 30-inch cooktop (model JGC3530G) + one module

- For any combination over 48 inches, combine multiple hoods to accommodate necessary width of cooktop
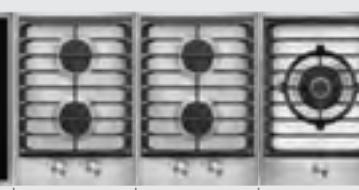

Modular Downdraft System

The modular downdraft system is designed to match the traditional or flush installation of all Jenn-Air® modular cooktops and companion 30- or 36-inch gas cooktops (models JGC3530G or JGC3536G). For specific guidelines, consult the Installation Instructions for the module(s) selected.

Examples:

- Use one strip for every two 15-inch modules or one 30-inch cooktop (model JGC3530G)

- Do not put a strip on both sides of a 15-inch gas (models JGC3215G or JGC3115G)

- Place a strip on each side of a 30-inch (model JGC3530G) or 36-inch gas cooktop (model JGC3536G)

BUILT-IN REFRIGERATORS
FRESH, TASTEFUL DESIGN

Jenn-Air® built-in refrigerators offer exterior design options that allow them to blend in beautifully, or become a striking focal point in a kitchen. In addition to fully integrated models that accept custom overlay panels, Jenn-Air® built-in refrigerators coordinate with other stainless steel Pro-Style® and Euro-Style appliances. Side-by-side, French door and bottom-freezer configurations provide storage and access options that fit any lifestyle.

Because of its prominence in the kitchen, it's important that a built-in refrigerator draw attention for the right reasons. Our **fully integrated and flush refrigerators** feature an articulating hinge that allows the refrigerator to blend into custom cabinetry because it requires little to no side clearance. The hinge emphasizes the quiet operation of all Jenn-Air® built-in refrigerators – some operate at levels comparable to the quietest dishwashers on the market.

Going beyond the striking exterior, French door and bottom-freezer refrigerators feature the **Twin Fresh™ climate control system** with sequential dual evaporators that allow true independent temperature control, reduce common food odors and keep humidity at optimum levels in both the refrigerator and freezer.

Our industry-exclusive **Obsidian interior finish** is a signature feature on every built-in refrigerator. The deep charcoal finish includes a shimmer that allows contents to "pop" visually against a contrasting background. Metal accents on the shelves, drawers and door bins complement the elegant look that extends into the freezer.

48"/42" Fully Integrated Side-by-Side Base Unit

JS48NXFXDE – 48"

JS42NXFXDE – 42"

- Industry-exclusive Obsidian interior with metal accents
- Fully integrated and flush design with articulating hinges
- Precision Temperature Management™ system with variable-speed compressor
- Advanced Climate Control drawer
- Soft, auto-close crisper drawers

Custom Overlay Design

Requires custom overlay panels and handles, not included.

Custom overlay panels and handles must be ordered separately from a cabinet maker or other manufacturer. Handle kits available to coordinate with Pro-Style® suite and Euro-Style suite. See page 130.

Coordinating Stainless Panel Kits

Customize your refrigerator to match our Pro-Style® or Euro-Style kitchen suite designs with one of our suite-coordinating panel kits. To do so, you must order one refrigerator base unit JS48NXFXDE or JS42NXFXDE and one of the panel kits.

Overall Product Dimensions

Euro-Style Stainless

Custom Storage for Your Fresh Ingredients

The Advanced Climate Control drawer features easy-to-use controls that allow precise, independent temperature control of specific food categories. On non-dispensing models, this feature controls the upper crisper drawer (shown left). Dispensing models have this feature on the deli drawer above the crisper (not shown).

Complete Your Entertaining Center with an Automatic Ice Machine

By adding an automatic ice machine to your kitchen, you're assured of being able to have up to 50 pounds of clear ice available every 24 hours.** Ice machines fit within our Euro-Style Stainless kitchen suite or accommodate a Pro-Style® handle kit. See page 151 for more details.

* Depth includes handles.

* Depth includes handles.   ** With the Max Ice option selected.

All Jenn-Air® appliances are appropriately UL, CUL or CSA approved.

FREESTANDING REFRIGERATORS
SHOWCASING GREAT TASTE

A Jenn-Air® freestanding refrigerator puts design into focus in refreshing ways. Side-by-side, traditional French door and four-door French door configurations give options for storing food in a way that fits any lifestyle. Counter-depth models, meaning refrigerators where only the doors and handles will extend beyond the base cabinet, create an integrated design that more closely approximates a built-in look.

Select freestanding refrigerators now feature our industry-exclusive **Obsidian interior finish**. This signature feature showcases food items throughout the refrigerator and provides a sharper contrast than white interiors. **WiFi connectivity** allows monitoring and adjustment of basic refrigerator functions through a mobile app.
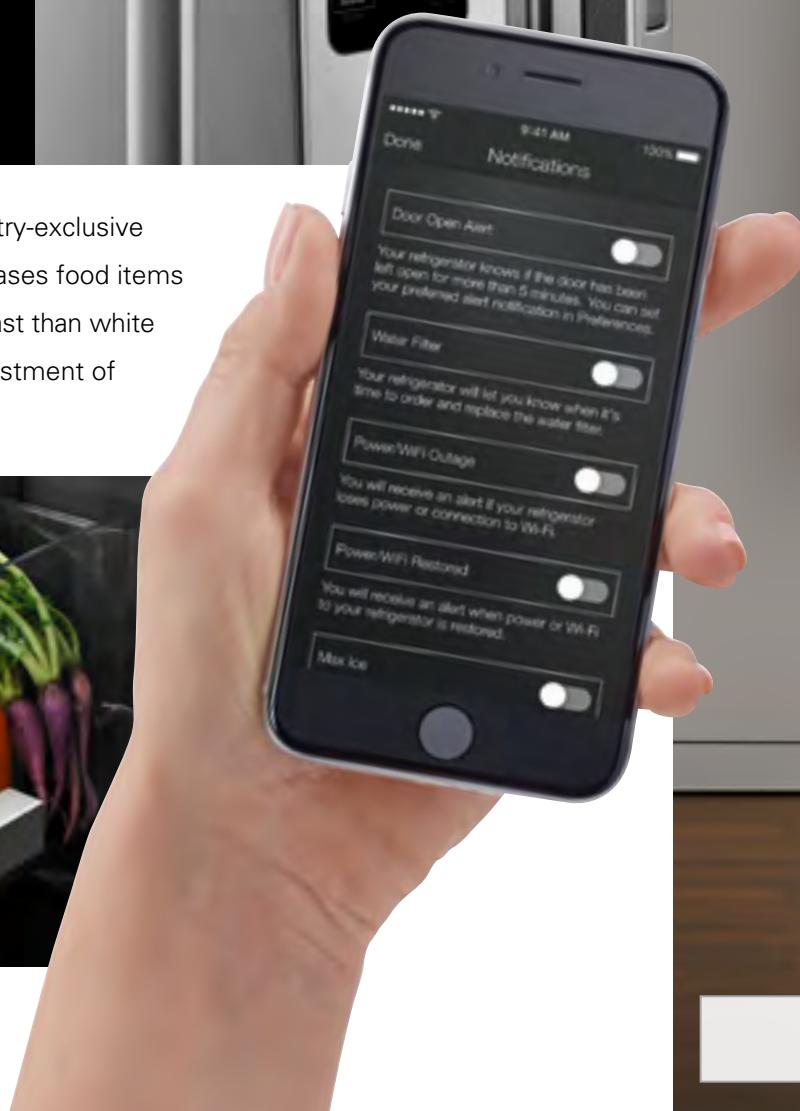

Among our freestanding refrigerators, select models, including connected refrigerators, feature the **Twin Fresh™ climate control system**. Two independent cooling systems keep humidity at optimum levels, so refrigerated food retains humidity to keep produce fresh while the freezer remains cold and dry to help prevent freezer burn.

72" Counter-Depth French Door Refrigerator with Ice & Water Dispenser

JFFCC72EF – 72" Style Option*: P, S

- 72-inch counter-depth design
- Industry-exclusive Obsidian interior with metal accents
- Twin Fresh™ climate control system with sequential dual evaporators
- WiFi connectivity
- Interior LED theater lighting

📶📱 **WiFi enabled**

Add Supplemental Refrigeration Where You Need It

Built-in, flush installation for Jenn-Air® under counter refrigerators adds a stylish option and sophisticated convenience to any room of your home. Use the extra storage as a prep area for foods waiting to be cooked or to store beverages and refreshments in a home theater. Options include double-refrigerator and refrigerator/freezer drawer configurations as well as a refrigerator, beverage center or wine cellar. See pages 148-150 for more details.

One-Hand Internal Water Dispenser

The design of this dispenser features a touch pad that allows you to use it with one hand. This creates convenient access to fresh, filtered water while maintaining the refrigerator's sleek, uninterrupted exterior.

Door-Mounted Ice Dispenser with Removable Bin

The door-mounted ice dispenser is an ideal feature for those who love to entertain. Its in-the-door location gives you easy access to large quantities of fresh, filtered ice, while increasing usable storage space. The removable bin features a handle and flat bottom, making it easy to serve guests.

Single-Paddle Cubed/Crushed Ice & Water Dispenser

Capacitive-touch controls make it easy to select cubed ice, crushed ice or chilled water. The Measured Fill feature dispenses water in precise amounts of ounces, cups or liters. And the dispenser has the same ramp-up lighting found inside the refrigerator.

* For cabinet color, see page 145.   ** Depth includes handles.

UNDER COUNTER REFRIGERATION
SHOWCASING GREAT TASTE

Today's open concept kitchens are ideal for under counter refrigeration appliances. But that's only the beginning of the opportunities. Whether inside the kitchen or in other areas of the home, Jenn-Air brand offers an under counter refrigeration solution to help homeowners relax or entertain. Choose 24-inch appliances that complement any lifestyle by organizing ingredient storage and providing extra capacity for refreshments.

Under counter beverage centers, refrigerators and wine cellars feature a Jenn-Air innovation, the multi-pivot articulating hinge, which makes it possible to achieve a **flush and seamless installation** with the cabinet's front and adjacent surfaces.

The wine cellar and beverage center feature **extendable racks with natural, beechwood tines**. The wine cellar can gently cradle and chill up to 46 bottles. The beverage center accommodates up to 14.

With a design that fits into standard cabinetry, **double drawers** are a great supplement to a primary refrigerator and can replace a full-size refrigerator in small households. With space that can be efficiently organized, these models, either two refrigerators or a refrigerator/freezer, open up the kitchen and keep ingredients close at hand for a designated prep area. They're also convenient in entertainment areas, where the refrigerator/freezer can provide a steady supply of fresh, filtered ice.

- Light-guided touch controls with temperature presets
- Interior LED marquee lighting with auto light display option
- 14 wine bottle capacity (2 UltraGlide, soft-close racks with beechwood tines)
- Elegance shelving (1 adjustable, 1 fixed)

Overall Product Dimensions
JUB24FRER/LER – 23⁷/₈" w x 34³/₈" h x 26" d*
JUB24FREC/LEC – 23⁷/₈" w x 34³/₈" h x 23⁷/₈" d†

Auto Light Option

A proximity sensor in the base grille triggers the LED lights to automatically ramp up when motion is detected. This allows you to locate specific bottles before you open the door, minimizing the time the door needs to stay open which can affect temperature.

Under Counter Refrigeration to the Max

When in a hurry or getting ready for entertaining, discerning customers know Jenn-Air brand specializes in helping them keep cool about the details. With the Max Ice option selected, the ice machine can produce up to 50 pounds of clear ice in 24 hours.

* Depth includes handles. † Depth does not include custom panels and/or handles.

* Depth includes handles. † Depth does not include custom panels and/or handles. The ice machine does not install entirely flush to cabinetry.

Pro-Style® Stainless Handle Kit*

W10588599

- Pro-Style® Stainless handle with diamond-etched grip available to replace pre-installed Euro-Style Stainless handle on double drawer refrigerators, under counter refrigerators, wine cellars and beverage centers

Pro-Style® Stainless Handle Kit

W10591217

- Pro-Style® Stainless handle with diamond-etched grip available to replace pre-installed Euro-Style Stainless handle on ice machines

Euro-Style Stainless Handle Kit*

W10334919

- Euro-Style Stainless handle available for custom wood panel applications on double drawer refrigerators, under counter refrigerators, wine cellars and beverage centers

Classic Stainless Tubular Handle Kit*

W10701399

- Classic stainless tubular handle available to replace pre-installed Euro-Style Stainless handle on double drawer refrigerators, under counter refrigerators, wine cellars and beverage centers

EveryDrop™ Water Filter Replacement Cartridge

EDR6D1

- For use with refrigerator/freezer drawers
- Replace every 6 months for optimal performance

EveryDrop™ Water Filter Cartridge

F2WC9I1

- For use with ice machine
- Replace every 9 months for optimal performance

* Two kits are required for refrigerator/freezer drawers and double-refrigerator drawers.

DISHWASHERS
GLEAMING RESULTS

With a Jenn-Air® dishwasher, hosts have the flexibility to accommodate a variety of dishwasher loads, from the largest pots and platters to the most delicate stemware and china. Our sleek line of dishwashers includes a model that delivers perfect alignment with adjacent cabinetry, including popular frameless, European-style cabinets.

Fully integrated touch controls are the first thing seen when the dishwasher is opened, but are concealed while the appliance is closed, creating a clean exterior with the surrounding cabinetry.

And, operating at as low as 40 decibels, Jenn-Air® dishwashers afford homeowners the luxury to read a book in near silence or chat with guests during dinner with virtually no hint that the appliance is running.

This quiet operation is partially enabled by the **TriFecta™ wash system**, which also delivers brilliant cleaning and water and energy reduction. After the wash cycle is complete, dishes may be dried with one of two active drying methods: **Precision Dry® or Precision Dry® Plus**. These methods help dishes fully dry by the end of the cycle to avoid unsightly water spots.

SteamFinish Option

The SteamFinish option, featured on the JDB9800CW and JDB9200CW, helps avoid the water spot faux pas. A mist of steam before the final rinse helps enhance shine and finish on glassware, while reducing water spots. The SteamFinish option provides outstanding results for tumblers, glass dishware and stemware during Sensor Wash, Cookware/ Bakeware and Normal Tableware cycles.

E. P = Pro-Style® Design includes stainless steel handle with diamond-etched grip;
S = Euro-Style Stainless Design includes slightly curved, stainless steel handle;
X = Custom Overlay Design requires custom panel and handle, not included.

COMPACTORS
ELEGANT, DISCREET CLEANUP

Beautifully complement the décor of your kitchen. Jenn-Air® compactors are available in a variety of style options. Choose from the attractive Euro-Style Stainless model with an elegantly-curved handle, or a Pro-Style® Stainless panel kit with a diamond-etched handle. A Custom Overlay Design option is also available, which lets your compactor blend with your cabinetry for a seamless, integrated look.

How can you make a night of entertaining a little easier? Let a Jenn-Air® compactor assist your cleanup efforts by **reducing your trash volume up to 80 percent.*** When you select the **Compress option**, 2,300 pounds of continuous pressure is applied to the contents, discreetly eliminating messes and ensuring contents stay compressed.

*When Compress option is selected.

Because you and your guests expect a fresh and clean kitchen environment, all compactors feature an **odor-control fan and charcoal filter** to help remove any stubborn, unwanted odors in the air.

Your hands are full during dinner-party cleanup, so your Jenn-Air® compactor gives you a **full-width foot pedal** that lets you open and start it quickly and easily with minimal use of your hands.

15" Compactor

TC707 – 15"

Style Option:

S Euro-Style Stainless

- Compress option
- 5:1 compaction ratio*
- Anti-jam and tilt sensors
- Fully integrated console

Refer to the Installation Instructions or Use & Care Guide before selecting cabinetry, verifying electrical/gas connections, making cutouts or beginning installation.
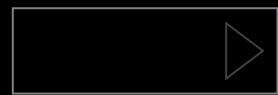

PLATINUM WARRANTY

2 YEAR LIMITED WARRANTY

This limited warranty will cover parts and labor to repair or replace, under normal residential use. Individual products may provide additional warranty coverage on specific parts and systems. Warranty terms are subject to change. Visit jennair.com for the most current warranty details including applicable terms, conditions, and exclusions, or consult the Use & Care Guide provided with your product.

Warranty Service

Under the limited warranty, when labor is provided, service must be performed by an Authorized Jenn-Air Service Contractor. To obtain service, contact the dealer from whom the unit was purchased, an authorized Service Contractor or Jenn-Air Customer Assistance. In the U.S.A. and Canada, call 1-800-JENN-AIR (1-800-536-6247). Please include model number, serial number and date of original purchase in all correspondence. Service will be provided during normal business hours. This warranty gives you specific rights, and you may also have other rights which vary from state to state or province to province.

Owner's Responsibilities

The customer has certain responsibilities which must be satisfied to qualify for coverage under these warranties. For all products, the owner is responsible for providing normal care and maintenance in accordance with the Use & Care instructions, providing proof of purchase on request, proper installation and making the appliance reasonably accessible for service.
