Usage step by step

Discover how easy it is to use your Bellairon! This short video walks you through every step to achieve effortlessly pressed shirts completely hands-free.

Quick setup

Before starting, make sure the mannequin bag elastic base is tightly hooked under the black frame.

Also, open (or close) the side zippers so the mannequin bag is slightly larger than the shirt for optimal air-pressure.

Then, simply place your damp shirt, button it up, adjust the collar, secure it with the weights, and select your preferred temperature.

Once you press start, **Bellairon automatically dries, irons, and refreshes** your shirt in about **10 minutes**, leaving it perfectly smooth and ready to wear.

Important tips for best results

- Always use **slightly damp garments** for optimal performance.
- Select the **right temperature setting** for your fabric:
 - 120°F-140°F for delicate fabrics
 - 160°F for cotton and linen shirts
- Make sure the shirt is **evenly placed and buttoned**, with the **collar adjusted and weights secured**.

Lifestyle tip

While Bellairon does the work, you're free to do something else, sip your coffee, read your emails, or get ready for the day.

It's the effortless, hands-free elegance your routine deserves.

Play the video and forget ironing as you know it.

How to Use Your Voyage

Effortless results, step by step.

Assemble the device

Attach the two side arms firmly to the main body.
The structure should feel solid and stable.

Add the Shirt Balloon Cover

Place the Shirt Balloon cover over the frame and close the back zipper completely.

Make sure no air can escape for perfect inflation.

Adjust the fit

Use the side zippers to match your shirt size.

The Balloon should always be slightly larger than the garment, this keeps the fabric smooth and stretched during drying.

Prepare your shirt

For best results, use a shirt that's slightly damp.

If it's already dry, lightly spray it with water to restore moisture.

Place the shirt

Slide your shirt over the Balloon evenly, without twisting the fabric.
Stretch the sleeves and bottom hem, then secure them with the elastic clips front and back.

Power on

Plug in Bellairon Voyage and press the power button once to start.

Choose your airflow

- **1 Press – Red Light:** Warm air / maximum flow ideal for drying and ironing shirts.
- **2 Presses – Red Light (low fan):** Warm air / gentle flow perfect for drying only or smaller items.
- **3 Presses – Blue Light:** Cool air for refreshing garments only.

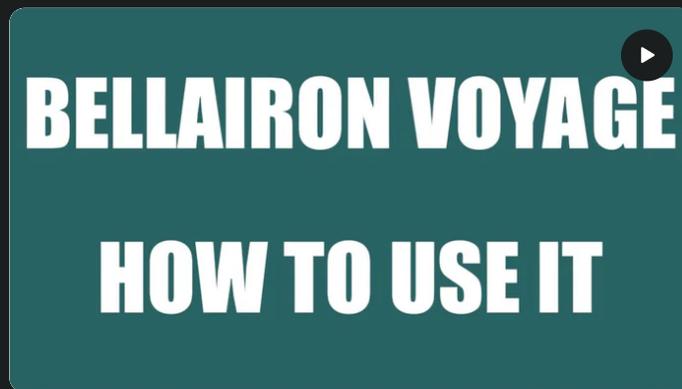

Wait & enjoy

A lightly damp shirt will be ready in **under 10 minutes**.

If freshly washed, allow **15–20 minutes**, depending on fabric.

Once smooth and dry, press the power button again to turn off.

Bellairon Voyage — *Effortless elegance, everywhere you go.*
